

Game Design Document: Geminus

GDD Governance

GDD Golden Rule: All entries must be documented in full detail. This document is the game's manual, its architectural blueprint, and the single source of truth. Summaries are forbidden; provide complete tables, unabridged formulas, and full mechanical explanations.

Edit Notes:

- **Version:** 2.0
- **Editor:** Geminus Project Manager
- **Date:** August 10, 2025
- **Changes:**
 - **Master Consolidation:** This document has been created by merging, integrating, and fully elaborating upon all previous GDDs (GDD Daily Aug 11, Daily GDD Aug 9th, GDD July) and the Balancing numbers.pdf document.
 - **System Integration:** All core systems have been integrated into the main body of the document, including the AP Allocation System, Special Monster Titles, Death & Revival, Gilded Vault Network, and detailed Quest Content.
 - **Full Elaboration:** All sections have been expanded from summaries into full, detailed explanations with complete data tables and design rationale, per the GDD Golden Rule.
 - **Core Gem Analysis:** Added a new subsection to guide players and developers on the most critical gems for each of the three archetypes.
 - **Appendices Finalized & Integrated:** All appendices have been populated with the complete, unabridged master data tables from all source files and are now fully displayed within this document.
 - Added section 1.6. Health and resources section
 - Updated Necklace table to display the new correct health regen%
 - Updated and Replaced section 1.1 with the new Hybrids, Martial Hybrids and Mystics Hybrids.

- Updated and replaced section 2.2.3
- Added section 6.3
- Add new section 2.3.4 GemCutter workshop 2.3.4.1, Socketing 2.3.4.2. Unsocketing 2.3.4.3, Fusing 2.3.4.4. Salvaging.
- Added 1.8. The Mastery system
- Added 1.3.1 Vampire and Troll formulas
- Replaced section 1.5 with new updated 1.5
- Added New fusion gems and primal gems for Vampires and trolls
- Added new enchants for vampires and trolls
- Added all missing formulas
- Added Accs
- Added more formulas
- Updated 2.3.4 Gemcutter workshop
- Date: August 28th, 2025:
 - Added 4.2.1 Clan system
 - Added 4.3.1 the armory system
 - Added 4.4.1 the gilded vault
 - Added 5.1.1 The soul forge
- Date: August 29th, 2025:
 - Updated Table of contents
- Date: Sept 6th, 2025:
 - Added Caster OFF hand and Fighter Buff Spell information Correctly back
 - Added our Technical Stack and Dev plan
- Date: October 8th, 2025:
 - **1.9. The Alignment System**

- 1.9.1. Design Philosophy
- 1.9.2. Core Mechanics
- 1.9.3. Alignment Tiers & Rewards
- 1.9.4. The Capstone Choice (Endgame)
- 1.9.5. UI/UX Implementation

Date March 28 2026

ARCHITECTURAL REFACTOR: Core Combat, Progression & Scaling

Target: Geminus Engine Master GDD & Version Control

Scope: `bestiaryData.js`, `zonesData.js`, `DevManager.js`, `systems.js`, `gdd.js`

1. The Global Combat Constants (SSOT Synchronization)

We identified a critical disconnect between the hypothetical balancing math and the live variables dictating the engine's actual combat. The Bestiary generator has been hard-linked to the Single Source of Truth (`gddConstants`) to dynamically read live damage multipliers.

- **Player Damage Constant (`PLAYER_DAMAGE_CONSTANT`):** Set to **90**. This acts as the universal numerator for player attacks, scaling damage exponentially faster than standard linear math.
- **Monster AC Reduction Factor (`MONSTER_DAMAGE_AC_REDUCTION_FACTOR`):** Set to **0.5**. The engine mathematically cuts the player's Armor Class in half before calculating incoming monster damage, requiring precise monster `ATK` tuning to prevent instant player death.

The Live Combat Formulas:

- **Player Damage Output:** $\text{Damage} = \frac{90 \times \text{Player WC}}{\text{Monster DEF}}$
 - **Monster Damage Output:** $\text{Damage} = \frac{90 \times \text{Monster ATK}}{\text{Player AC} \times 0.5}$
 - **Player Maximum HP:** $\text{HP} = 100 + (\text{VIT} \times 10)$
-

2. The 400,000-Level Progression Map

The linear Level 1-400 curve has been eradicated and replaced with an exponential 400,000-level ARPG progression curve.

Parallel Starter Zones (Z01 - Z24):

- All 24 racial starter zones are hardcoded to **Level 1**.
- These zones exclusively drop and are balanced around **Tier 1 Gear**.

The Ascendant Curve (Z25 - Z101):

- Progression officially becomes linear/exponential starting at **Zone 25 (Level 100)**.
 - The level targets are mapped across the following GDD Anchors using quadratic interpolation for a smooth curve:
 - Z25: Level 100
 - Z34: Level 1,000
 - Z59: Level 6,143
 - Z87: Level 172,222
 - Z95: Level 200,000
 - Z101: Level 400,000
-

3. The "Gear-Assembly Staircase" (Bestiary Balancing)

Monsters are no longer balanced via arbitrary scalar multipliers. Every zone is dynamically balanced using a "Floor-to-Ceiling" Ghost Player simulation to enforce the **Gear-Assembly Loop**.

The True Armory Multiplier

Gear progression assumes an exponential power growth of **1.22x per Tier**, starting from a baseline of 26 WC (Dual Wield) and 45.5 AC (Full Armor).

The Floor (Mob 1 - Standard/Minion)

- **Target Player:** Entering the zone wearing *zero* of the current tier's gear (Previous Tier baseline).
- **Time-To-Kill (TTK):** The Floor Player will kill Mob 1 in exactly **2 Swings**.
- **Lethality:** Mob 1 will kill the Floor Player in exactly **10 Swings**.

The Ceiling (The Boss)

- **Target Player:** Reaching the Boss wearing *100% full gear* of the current zone's tier.
- **Time-To-Kill (TTK):** The Ceiling Player will kill the Boss in exactly **5 Swings**.
- **Lethality:** The Boss will kill the Ceiling Player in exactly **4 Swings**.
- *Note: A Floor Player attempting the Boss will be mathematically annihilated.*

The Gradient

Monsters between Index 0 and the Boss scale on a smooth gradient percentage, acting as stepping stones that mandate the player farm gear drops before progressing to the end of the zone.

4. Data Schema Integrity Fixes

- **Property Mapping:** The `bestiaryData.js` object keys for monster offensives and defensives were incorrectly labeled as `damage` and `ac`. The engine (`Systems.js`) strictly looks for `atk` and `def`. The Forge now correctly outputs `atk` and `def`, permanently fixing the "1-Shot Boss / Naked God" paradox.
 - **Mathematical Floors:** Applied hard minimums to Level 1 zones to prevent decimal collapse (e.g., minimum 10 HP, 2 ATK, 5 DEF).
-

5. Developer Tools Upgraded (`DevManager.js`)

Two new self-healing algorithms were injected into the engine:

1. **`forgeEntireBestiary()`:** Reads the flat `bestiaryData.js` file, preserves all custom monster IDs, names, and types, recalculates their exact stats against the 400,000-level GDD curve, and copies the repaired raw JS code to the developer's clipboard.
2. **`forgeZonesData()`:** Synchronizes the `minLevel` requirements in `zonesData.js` to perfectly match the exact mathematical anchors used by the Bestiary, copying the raw array to the clipboard.

ARCHITECTURE OVERRIDE: v2.0

Combat & Scaling Refactor - 03-28-2026

*(Note to Developers: The systems, formulas, and progression scaling defined in this section **supersede** any legacy math or level caps found later in this GDD).*

1. Global Combat Constants (The SSOT)

The engine now strictly reads damage modifiers from `gddConstants` to balance combat:

- **PLAYER_DAMAGE_CONSTANT:** 90 (Player Damage = $(90 * \text{Player WC}) / \text{Monster DEF}$)
- **MONSTER_DAMAGE_AC_REDUCTION_FACTOR:** 0.5 (Monster Damage = $(90 * \text{Monster ATK}) / (\text{Player AC} * 0.5)$)
- **Player Maximum HP:** $100 + (\text{VIT} * 10)$

2. The 400,000-Level Progression Map

The legacy 1-400 level cap has been replaced by an exponential 400k ARPG curve.

- **Parallel Starters (Z01 - Z24):** All 24 racial starter zones are hardcoded to **Level 1** and exclusively drop Tier 1 Gear.
- **The Ascendant Curve (Z25 - Z101):** The linear climb begins at Zone 25 and scales via quadratic interpolation across these anchors:
 - Z25: Level 100
 - Z34: Level 1,000
 - Z59: Level 6,143
 - Z87: Level 172,222
 - Z101: Level 400,000

3. The "Gear-Assembly Staircase" (Zone Balancing)

Monster stats are no longer flat multipliers. Every zone is dynamically generated using a "Floor-to-Ceiling" Time-to-Kill (TTK) simulation based on an exponential gear growth curve of **1.22x per Tier**:

- **Mob 1 (The Floor):** Balanced so a player entering the zone wearing *zero* of the current tier's gear can kill it in 2 swings.
- **The Boss (The Ceiling):** Balanced so a player wearing *full* current-tier gear can kill it in 5 swings (and survive 4 hits). A player attempting the Boss without farming the zone's gear will be mathematically annihilated.
- **Data Integrity:** Monster defensives and offensives are now strictly mapped to **atk** and **def** to perfectly align with **Systems.js**.

Table of Contents

Introduction

- High Concept
- Target Audience & Platform
- Core Gameplay Loop
- Core Design Pillars

Part I: The Player Character

- 1.1. The "Race as Class" System & The Three Archetypes
- 1.2. Core Attributes and Derived Stats
- 1.3. Definitive Derived Stat Formulas
 - 1.3.1. Special Case: VIT-Scaling Formulas (Troll & Vampire)
- 1.4. Character Progression Systems
 - 1.4.1. Experience Curve
 - 1.4.2. Attribute Point (AP) Allocation System
- 1.5. The Racial Power System
- 1.6. Health & Resources Systems
 - 1.6.1. Health Regeneration
- 1.7. Attribute Requirements for Equipment
- 1.8. The Mastery System
- 1.9. The Alignment System

Part II: Itemization and the Geminus Economy

- 2.1. Gear and Equipment
 - 2.1.1. Definitive Item Stat Calculation
- 2.2. The Shadow & Echo Systems: Procedural Loot
- 2.3. The Gem System
 - 2.3.1. The Three Tiers of Gems

- 2.3.2. Core Gem Analysis for Builds
- 2.3.3. Gem Drop Distribution Rules
- 2.3.4. The Gemcutter's Workshop: Advanced Gem Management
 - 2.3.4.1. Socketing
 - 2.3.4.2. Unsocketing
 - 2.3.4.3. Fusing (Legacy)
 - 2.3.4.4. Gem Crucible
 - 2.3.4.5. Salvaging (Gem Smashing)
- 2.4. The Enchantment System
- 2.5. The Accessory System
 - 2.5.1. The Jewelry System (Rings & Necklaces)
- 2.6. Core Economic Principles and Loops

Part III: Combat and World Systems

- 3.1. Combat Mechanics and Definitive Formulas
- 3.2. Monster Design and Hierarchy
 - 3.2.1. Monster Tier Definitions
 - 3.2.2. Monster Scaling Formulas
 - 3.2.3. Special Monster Title System
- 3.3. The World of Geminus: Zone Structure and Progression
- 3.4. Zone Boss Mechanics
- 3.5. Death & Revival

Part IV: Player Engagement Systems

- 4.1. The Quest System: Streaks and Bounties
- 4.2. Social Framework: Clans & Player Estates

- 4.2.1. The Clan System
- 4.3. Commerce: The Black Market & P2P Trading
- 4.3.1. The Armory (NPC Vending)
- 4.4. The Gilded Vault Network
- 4.4.1. The Gilded Vault Network-Details

Part V: The Endgame: The Path to Ascension

- 5.1. The Soulforge: Advanced Shadow Upgrades
 - 5.1.1. Feature Overview
- 5.2. The Prestige Loop: Requirements & Consequences of Ascension

Part VI: Technical Implementation & Data Schemas

- 6.1. Core Data Structure Blueprints
- 6.2. Finalized Data Schemas
- 6.3. Archetype-Driven Logic

Appendices

- Appendix A: Master Character Creation Data
- Appendix B: Master Progression Tables
- Appendix C: Complete Bestiary (Z01-Z101)
- Appendix D: Master Gem Compendium
- Appendix E: Master Enchantment Compendium
- Appendix F: Master Accessory Compendium
- Appendix G: Master Quest Compendium
- Appendix H: Race-Specific Starting Equipment Kits
- Appendix I: The Jewelry System (Rings & Necklaces)
- Appendix J: Master Dropper Equipment Compendium

Technology Stack & Architecture

Overview

The technical architecture for *Geminus Online Game (GOG)* is built upon a modern, scalable, and secure technology stack designed for rapid development and long-term viability. Our approach utilizes a powerful client-side framework for a rich user experience and a serverless backend to ensure security, real-time data synchronization, and effortless scalability. This allows the development team to focus on core game features and content creation rather than server infrastructure management.

Front-End (Client-Side)

The client is the web-based application that players will interact with directly in their browsers.

- **Core Framework: React.js**
 - **Description:** A JavaScript library for building dynamic and responsive user interfaces.
 - **Role in GOG:** React's component-based architecture will be used to construct all elements of the game's UI, including character information panels, inventory systems, maps, chat windows, and skill trees. This enables a modular and maintainable codebase, crucial for a complex RPG interface.
 - **Base Technologies: HTML5, CSS3, JavaScript (ES6+)**
 - **Description:** The fundamental building blocks of the modern web.
 - **Role in GOG:** These technologies will form the structural, stylistic, and interactive foundation upon which the React application is built.
-

Back-End (Server-Side)

The back-end is powered by Google's Firebase platform, a comprehensive Backend-as-a-Service (BaaS) that provides all necessary server-side functionality.

- **Primary Database: Cloud Firestore**
 - **Description:** A flexible, scalable NoSQL cloud database with real-time synchronization capabilities.
 - **Role in GOG:** Firestore will serve as the game's central nervous system, storing all persistent data including player profiles, character stats, inventory, equipment, quest progress, and the overall state of the game world. Its real-time listeners are critical for instantly reflecting player actions to others in the game world.
- **Server-Side Game Logic: Cloud Functions**
 - **Description:** A serverless compute service that runs code in response to events.

- **Role in GOG:** Cloud Functions will house all authoritative game logic. Critical calculations such as combat damage, loot drops, quest rewards, and skill checks will be executed here. This server-authoritative model is essential for preventing client-side cheating and ensuring a fair game environment.
 - **Player Account Management: Firebase Authentication**
 - **Description:** A secure, end-to-end identity solution.
 - **Role in GOG:** Will manage the entire player authentication process, including sign-up, login, and password management. It provides a secure and easy-to-implement system for player accounts.
 - **Asset Hosting: Cloud Storage**
 - **Description:** A powerful, simple, and cost-effective object storage service.
 - **Role in GOG:** Will be used to store and deliver all static game assets, such as images (icons, sprites, map tiles), sound effects, and music files.
-

Strategic Rationale

The selection of this technology stack provides several key strategic advantages:

- **Scalability:** The serverless architecture automatically scales to meet player demand, from a small beta test to a massive global launch.
 - **Development Velocity:** By leveraging a BaaS, we significantly reduce the time spent on backend setup and maintenance, accelerating the development of core game features.
 - **Security:** We inherit Google's robust security infrastructure for our database, user authentication, and server-side logic.
 - **Real-Time Capabilities:** Firestore's native real-time functionality is perfectly suited for a dynamic, multi-user online game.
 - **Cost-Effectiveness:** The pay-as-you-go model is financially efficient, with a generous free tier that is ideal for the development and initial launch phases.
-

Introduction

High Concept: Geminus is a semi-idle, dark fantasy RPG architected for deep, long-term, and potentially endless progression. It merges the strategic depth and complex character

optimization of classic RPGs with the high-velocity, rewarding grind of modern idle games. The experience is centered on a multi-layered procedural loot system, extensive character customization through 24 distinct races, and a meticulously balanced mathematical foundation that supports gameplay from the first level to beyond level 400,000.

Target Audience & Platform: The game is designed for players who enjoy classic RPGs (CRPGs), theory-crafting, complex character progression, and loot-based games such as the Diablo or Path of Exile series. It also appeals to the idle and incremental game communities who appreciate long-term optimization and satisfying progression loops. The primary platform is web browsers, featuring a responsive user interface (UI) designed for full functionality on both desktop and mobile devices.

Core Gameplay Loop: Grind, Grow, Advance, Optimize

The player's journey in Geminus is defined by a central, repeatable cycle that forms the foundation of the entire gameplay experience. This loop is designed to be deeply engaging, offering continuous strategic choices that directly impact a player's efficiency and power.

1. **Engage & Grind:** The player selects a zone and engages in combat against its monstrous inhabitants. The combat system is balanced to facilitate a high Kills Per Minute (KPM) rate for properly equipped characters, making the grind feel active and rewarding.
2. **Grow:** Victory yields Gold, Experience Points (XP), and a chance to receive powerful loot in the form of Gems and procedural "Shadow" items. Through XP accumulation, the player levels up, gains Attribute Points (AP) to enhance their character, and grows demonstrably more powerful.
3. **Advance & Optimize:** As the player progresses, the exponential XP curve creates a "Grind Wall," where leveling slows dramatically. This is not a punitive measure but a deliberate design choice that forces meaningful engagement with the game's deep itemization systems. At this critical juncture, the player must make a strategic decision. They can either **Advance** by pushing into the next, more dangerous zone to reset the rapid leveling cycle against weaker foes, or they can **Optimize** by remaining in their current zone to farm for better Shadow gear, Gems, and Enchantments to increase their killing efficiency and break through the wall.

This core loop creates a compelling tension between vertical progression (advancing through zones) and horizontal progression (deepening power within a specific tier). The player's ability to balance these two paths is the central strategic challenge of Geminus.

Core Design Pillars

1. **The Rewarding Grind:** The game's combat and economy are balanced around the philosophy that a well-gear player, or "Farmer," should be able to defeat basic monsters in a single hit. This state of high efficiency is the player's primary goal. In contrast, an

under-gearred player, or "Pusher," will require multiple hits, effectively halving their progression speed. This dynamic creates a powerful and tangible incentive for players to engage deeply with the loot and upgrade systems to achieve optimal farming status.

2. **Endless Progression & The Long Tail:** The game is architected to provide a near-infinite progression path. With a level cap extending beyond 400,000, over 100 unique zones, 20 tiers of gear, and 9 grades of gems, the core game offers thousands of hours of content. The endgame "Path to Ascension" system provides a repeatable prestige loop, ensuring that the most dedicated players always have a new, meaningful goal to pursue.

3. **Perfect Mathematical Balance:** All core systems, from combat formulas to racial abilities, are built upon a foundation of standardized mathematical principles. This is most evident in the "Racial Power" and "AP Allocation" systems, which ensure that no single race, class, or strategy becomes dominant at any stage of the game. This commitment to balance preserves strategic diversity, ensures all 24 races are viable, and maintains the integrity of player choice from start to finish.

4. **Procedural Variety:** The "Shadow" and "Enchantment" systems are designed to procedurally generate a near-infinite variety of loot. By combining base item stats with random quality multipliers and enchantments, every drop has the potential to be a significant upgrade. This makes the core grinding loop consistently exciting and ensures long-term item relevance, preventing the "best-in-slot" stagnation common in many RPGs.

Part I: The Player Character

The player character is the central agent through which the world of Geminus is experienced. The systems governing its creation, attributes, and progression are designed to offer deep customization while adhering to the core pillar of perfect mathematical balance.

1.1. The "Race as Class" System & The Three Archetypes

The choice of one of 24 races is the most significant a player makes. This choice is permanent and defines the character's core mechanical archetype and thematic identity. In Geminus, the **Race IS the Class**. These races are divided into three distinct archetypes, with the Hybrid archetype further divided into two specialized paths.

- **True Fighter Definition**
 - **Concept:** Masters of martial combat who focus on overwhelming physical force through the skilled use of weaponry. Their power is derived purely from their physical prowess, scaled by the Dexterity attribute.

- **Equipment Slots (11):** Weapon 1, Weapon 2, Helmet, Gloves, Armor, Legs, Boots, Necklace, Ring, **Fighter Buff Spell 1**, **Fighter Buff Spell 2**, and 1 Accessory.
- **Combat Action:** A single "Attack" button.
- **True Caster Definition**
 - **Concept:** Wielders of immense magical power who vanquish foes from a distance by channeling raw elemental or arcane energies. Their power is derived purely from their magical insight, scaled by the Wisdom attribute.
 - **Equipment Slots (11):** Damage Spell 1, Damage Spell 2, Helmet, Gloves, Armor, Legs, Boots, Necklace, Ring, **Caster Off-Hand 1**, **Caster Off-Hand 2**, and 1 Accessory. **Combat Action:** A single "Cast" button.
- **The Definitive Hybrid Definition**
 - **Concept:** Versatile combatants who seamlessly blend martial and magical arts. Hybrids are unique in that they follow one of two paths, channeling their power differently but always culminating in their signature "Spellstrike" combat action.
 - **Equipment Slots (11):** Weapon 1, Weapon 2, Helmet, Gloves, Armor, Legs, Boots, Necklace, Ring, Spell 1, Spell 2 and 1 Accessorie.
 - **Combat Action:** A single, unique "Spellstrike" button.
 - **Sub-Archetypes:**
 - **Martial Hybrid:** A DEX-based warrior who infuses their physical attacks with magic. Their power scales with **Dexterity**. The races that follow this path are the **Angel**, **Aasimar**, **Banshee**, and **Halfling**.
 - **Mystic Hybrid:** A WIS-based warrior who empowers their martial arts with magical insight. Their power scales with **Wisdom**. The races that follow this path are the **Dwarf**, **Demon**, **Draugr**, and **Unicorn**.

1.2. Core Attributes and Derived Stats

A character's power is defined by five primary attributes. These attributes have been precisely defined to support the three-archetype system, including the new Martial and Mystic Hybrid paths.

- **Strength (STR):** A gatekeeper stat. Its sole purpose is to meet the minimum requirements to equip physical weapons and shields. It does not directly scale damage for any archetype.
- **Dexterity (DEX):** The primary combat and damage stat for **True Fighters** and **Martial Hybrids**. It governs Hit Chance, Critical Hit Chance, and directly scales Weapon Class (WC). For Martial Hybrids, it also scales their Spell Class (SC).
- **Vitality (VIT):** The primary survivability stat for all archetypes. It governs Maximum HP and the ability to equip armor and jewelry. **For the Troll and Vampire races, it also functions as their primary offensive attribute, a unique exception detailed in Section 1.3.1.**
- **Intellect (NTL):** A gatekeeper stat. Its sole purpose is to meet the minimum requirements to equip spells. It does not directly scale damage for any archetype.
- **Wisdom (WIS):** The primary combat and damage stat for **True Casters** and **Mystic Hybrids**. It governs spell accuracy, spell critical chance, and directly scales Spell Class (SC). For Mystic Hybrids, it also scales their Weapon Class (WC).

1.3. Definitive Derived Stat Formulas

- **Maximum HP:** $(100 + (VIT * 10))$
- **Armor Class (AC):** $(\text{Sum of AC from Gear}) * (1 + (VIT * 0.0075))$
- **Weapon Class (WC) (True Fighter):** $(\text{Sum of WC from Gear}) * (1 + (DEX * 0.0055))$
- **Spell Class (SC) (True Caster):** $(\text{Sum of SC from Gear}) * (1 + (WIS * 0.0055))$
- **Weapon Class (WC) (Martial Hybrid):** $(\text{Sum of WC from Gear}) * (1 + (DEX * 0.0055))$
- **Spell Class (SC) (Martial Hybrid):** $(\text{Sum of SC from Gear}) * (1 + (DEX * 0.0055))$
- **Weapon Class (WC) (Mystic Hybrid):** $(\text{Sum of WC from Gear}) * (1 + (WIS * 0.0055))$
- **Spell Class (SC) (Mystic Hybrid):** $(\text{Sum of SC from Gear}) * (1 + (WIS * 0.0055))$

- **Hit Chance (True Fighter/Martial Hybrid):** $90 + (\text{DEX} * 0.05)$
- **Hit Chance (True Caster/Mystic Hybrid):** $90 + (\text{WIS} * 0.05)$
- **Critical Hit Chance (True Fighter/Martial Hybrid):** $5 + (\text{DEX} * 0.01)$
- **Critical Hit Chance (True Caster/Mystic Hybrid):** $5 + (\text{WIS} * 0.01)$
- **Spellstrike Damage (All Hybrids):** The Spellstrike action deals damage from both WC and SC simultaneously. The final damage is calculated as follows:
 - $\text{WC_Damage} = (90 * \text{Player_WC}) / \text{Monster_AC}$
 - $\text{SC_Damage} = (90 * \text{Player_SC}) / \text{Monster_AC}$
 - **Final Damage:** $(\text{WC_Damage} + \text{SC_Damage}) * 0.8$

■ *Design Note: The 0.8x modifier is a global balance lever to ensure Hybrid damage output is comparable to specialists.*

1.3.1. Special Case: VIT-Scaling Formulas (Troll & Vampire)

Design Rationale & Philosophy

To create unique build paths and enhance racial identity, the Troll and Vampire archetypes are intentionally designed to break the standard stat model. Their offensive power scales with Vitality, rewarding investment in survivability with a commensurate increase in damage output. This creates a powerful synergy that is unique to their playstyle.

This is a deliberate design choice with two core goals:

- **Create Unique Gameplay:** It allows for the emergence of powerful niche builds, such as the "Regen Juggernaut" or "Blood Mage," that play differently from any other race.
- **Reward Strategic Investment:** It makes the choice to click the "VIT" button during level-up a compelling offensive and defensive decision for these races, something no other race experiences.

Formulas & Implementation

The **Archetype-Driven Logic (Section 6.3)** will include a specific check for the Troll and Vampire races, applying their unique VIT-to-WC/SC scaling formulas instead of the standard ones.

- **Troll (True Fighter - Juggernaut):** The Troll's **Weapon Class** scales with VIT instead of DEX. This reinforces their identity as a regenerating brute whose durability is their greatest weapon.

- **Weapon Class (WC) (Troll):** $(\text{Sum of WC from Gear}) * (1 + (\text{VIT} * 0.0055))$
- **Vampire (True Caster - Sanguinist):** The Vampire's **Spell Class** scales with VIT instead of WIS. This makes them a true "Blood Mage," whose power is derived from their own life force.
- **Spell Class (SC) (Vampire):** $(\text{Sum of SC from Gear}) * (1 + (\text{VIT} * 0.0055))$

1.4. Character Progression Systems

1.4.1. Experience Curve

The experience required to advance to the next level is governed by an exponential formula designed to create the "Grind Wall" dynamic central to the core loop.

- **Formula:** $\text{XP_to_Level} = 200 * (1.12 ^ \text{Current_Level})$

1.4.2. Attribute Point (AP) Allocation System

This system preserves strategic depth while eliminating tedious point-by-point management. It elegantly enforces archetypal roles while allowing for calculated flexibility, upholding the "Perfect Mathematical Balance" pillar.

- **Gaining AP:** Upon each level-up, the player is granted a pool of **40 Attribute Points**.
- **Spending AP:** The player clicks one of the five stat buttons (STR, DEX, VIT, NTL, or WIS). This single choice distributes the entire 40-point pool across all five stats according to the character's unique racial weights, with special modifiers based on the stat chosen.
- **Distribution Logic & Modifiers:**
 - **Clicking a Main Stat (DEX for Fighters/Hybrids; WIS for Casters):** The 40 points are distributed normally according to the race's weights, providing a balanced increase that favors their primary role.
 - **Clicking VIT:** The amount of VIT gained is multiplied by **1.5x**. This bonus amount is then deducted from the DEX (for Fighters/Hybrids) or WIS (for Casters) gain for that level, representing a trade-off between survivability and damage.
 - **Clicking an Off-Stat (e.g., a Fighter clicking WIS):** The gain for the clicked Off-Stat is swapped with its corresponding Main Stat, with a **25% penalty** applied to the Off-Stat's gain. This allows for hybrid builds at a calculated efficiency cost. The pairs are STR-NTL and DEX-WIS.

Racial Weight Distribution Formula: When AP is spent, the 40-point pool is distributed based on the character's racial weights. The formula for how many points are allocated to a single stat (before any modifiers for clicking VIT or Off-Stats) is:

$$\text{PointsGained} = \text{floor}(40 * (\text{StatWeight} / \text{TotalWeight}))$$

Where **TotalWeight** is the sum of all five stat weights for that race. *(Note: A small number of points may be lost due to rounding, which is an intentional part of the balance.)*

1.5. The Racial Power System

This system of racial passives, which unlocks at level 101, is the capstone of the character balance philosophy. It replaces potentially unbalanced unique passives with a standardized model that ensures perfect long-term balance while reinforcing each race's Core Combat Identity.

"Racial Power" Formula: Racial Power is a derived stat that fuels a race's passive ability. It is calculated from a source stat determined by the character's archetype.

- **Source Stats:**
 - True Fighters & Martial Hybrids: **DEX**
 - True Casters & Mystic Hybrids: **WIS**
 - Special Case (Troll & Vampire): **VIT**
- **Calculation:**
 - **Single Primary Stat Races:** Racial Power = $\text{PrimaryStat} * 0.10$
 - **Hybrid/Dual-Stat Races:** Racial Power = $(\text{Stat1} * 0.05) + (\text{Stat2} * 0.05)$

Application of Racial Power: The Racial Power value is applied directly to the specific combat statistic defined by the race's passive (see Table A3).

- For effects targeting a **percentage stat** (e.g., **Double Hit Chance %**), a Racial Power of 5.0 adds **+5%**.

- For effects targeting **Weapon Class** or **Spell Class**, the Racial Power value is added as a **flat amount** to the base stat before other multipliers are applied.

Progression Tiers: The effectiveness of these passives increases at major level milestones:

- **Tier 1:** Unlocks at Level 101 (100% effectiveness)
- **Tier 2:** Unlocks at Level 50,000 (200% effectiveness)
- **Tier 3:** Unlocks at Level 150,000 (300% effectiveness)

1.6. Health & Resources Systems

1.6.1. Health Regeneration

Design Philosophy

The Health Regeneration system in Geminus is designed to be both intuitive for new players and strategically deep for veterans. It utilizes a hybrid model that combines **static, level-based regeneration** with **percentage-based regeneration** from gear and effects.

This approach achieves three primary goals:

1. **Early-Game Viability:** Ensures all characters have a baseline of survivability, preventing the early game from feeling overly punishing.
2. **Late-Game Scalability:** Provides a meaningful stat (% HP Regen) that scales indefinitely with player power and investment, rewarding build customization.
3. **Balance & Stability:** Prevents the extreme stat inflation common in static-only systems and avoids the "unkillable tank" problem by providing clear levers for balance.

Core Components & Formulas

A character's total health regeneration per turn is calculated from two primary sources: **Base Regeneration** and **Gear Regeneration**.

1. Base Character Regeneration (Static) This is an innate regeneration value every character possesses. It grows automatically as the character levels up, ensuring a foundational level of health recovery at all stages of the game.

- **Purpose:** Provides consistent, reliable healing that is most impactful during the early-game leveling phase.

- **Formula:** $\text{BaseRegen} = \text{floor}((\text{BaseValue}) + (\text{PlayerLevel} * \text{LevelMultiplier}))$
- **Defined Constants:**
 - BaseValue: **5** (The starting regeneration at Level 0)
 - LevelMultiplier: **1.5** (The amount of regen gained per level)
- **Progression Example Table:**

Player Level	Calculation	Base HP Regen / turn
1	$5 + (1 * 1.5)$	6
10	$5 + (10 * 1.5)$	20
25	$5 + (25 * 1.5)$	42
50	$5 + (50 * 1.5)$	80
75	$5 + (75 * 1.5)$	117
100	$5 + (100 * 1.5)$	155

2. Gear & Effect Regeneration (Percentage) This regeneration is sourced from character effects, primarily items, enchantments, and passive skills. It is calculated as a percentage of the character's Maximum HP, directly rewarding investment in health-boosting stats and gear.

- **Purpose:** To create a scalable, build-defining mechanic that synergizes with other character stats and remains relevant in the endgame.
- **Sources:** Items (Jewelry, Armor), Gems, Enchants, temporary Buffs, and permanent Passive Skills.
- **Formula:** $\text{GearRegen} = \text{CurrentMaxHP} * \text{sum}(\% \text{RegenFromAllSources})$
- **Example Calculation:** A player has 4,200 Maximum HP. They are wearing:

- Amulet: +1.2% HP Regen
- Ring: +0.8% HP Regen
- Passive Skill: +1.0% HP Regen
- Total % Regen: $1.2\% + 0.8\% + 1.0\% = 3.0\%$
- Their GearRegen is: $4200 * 0.03 = 126$ HP/turn.

Final Regeneration Calculation

The final regeneration value is the sum of the Base and Gear components.

- **Total Regeneration Formula:** $\text{TotalRegenPerTurn} = \text{BaseRegen} + \text{floor}(\text{GearRegen})$
- **Comprehensive Example:**
 - **Character:** A Level 40 Fighter.
 - **BaseRegen Calculation:** $5 + (40 * 1.5) = 65$ HP/turn.
 - **Stats & Gear:** The Fighter has 3,500 Maximum HP and a total of +2.5% HP Regen from their gear.
 - **GearRegen Calculation:** $3500 * 0.025 = 87.5$. This is floored to 87 HP/turn.
 - **Final Value:** $65 + 87 = 152$ HP regenerated per turn.

Balancing & System Modifiers

To ensure combat remains engaging, regeneration is subject to situational modifiers.

- **In-Combat Regeneration Modifier:** While a player is flagged as "In-Combat" (having recently dealt or taken damage within the last 0.5 seconds), their TotalRegenPerTurn is reduced. This prevents players from passively out-healing enemy damage in active encounters.
 - **Formula:** $\text{CombatRegen} = \text{TotalRegenPerTurn} * (1 - \text{InCombatPenalty})$
 - **Recommended Value:** InCombatPenalty = 0.5 (A 50% reduction to regeneration while in combat).
- **UI/UX Implementation:**
 - The Character Sheet will display a single, final value for "HP Regen / turn".
 - Hovering over this stat with a tooltip will show a detailed breakdown:

HP Regen: 152 / turn

- Base: 65
- From Gear: 87
- *(Reduced to 76/turn in combat)*

1.7. Attribute Requirements for Equipment

1.7.1. Design Philosophy

To create a meaningful early-to-mid-game progression and to deepen the value of procedural "Shadow" loot, attribute requirements are applied to all standard, shop-bought **"Dropper"** items. This system reinforces the core loop by forcing players to make strategic decisions about their stat allocation to gain power, while making the discovery of a Shadow item—which has **no attribute requirements**—a moment of liberation and significant advancement.

1.7.2. Core Rules

1. **Droppers Only:** Attribute requirements apply **only** to "Dropper" items purchased from vendors. All procedurally generated "Shadow" and "Echo" items have their attribute requirements removed, allowing them to be equipped freely.
2. **Stat-to-Slot Assignment:** The required attribute is determined by the item's function:
 - **Strength (STR):** Required for all physical weapons (Swords, Axes, Maces, etc.)
 - **Intellect (NTL):** Required for all magical Spellbooks.
 - **Vitality (VIT):** Required for all Armor pieces (Helmet, Armor, Legs, Gloves, Boots) and all Jewelry (Necklaces, Rings).
3. **Scaling:** The amount of a required stat increases with the Item Tier. The scaling is designed to be a meaningful consideration in the early game but becomes less of a barrier in the late game as players transition to Shadow gear and focus on their primary damage stats (DEX/WIS).

1.7.3. Dropper Item Requirement Progression Table

This table outlines the minimum stat required to equip a Dropper item of a given Tier.

Tier	STR Req. (Weapons)	NTL Req. (Spells)	VIT Req. (Armor/Jewelry)
I	5	5	5
II	15	15	20
III	25	25	35
IV	40	40	50
V	55	55	70
VI	70	70	90
VII	90	90	110
VIII	110	110	135
IX	130	130	160
X	155	155	190
XI	180	180	220
XII	205	205	250
XIII	230	230	285

XIV	260	260	320
XV	290	290	355
XVI	320	320	395
XVII	350	350	435
XVIII	385	385	475
XIX	420	420	520
XX	455	455	565

1.8. The Mastery System

1.8.1. Design Philosophy

The Mastery system is a parallel progression path designed to reward players for their dedication to a specific playstyle. Unlike leveling, which represents a character's overall power, Mastery represents their **skill and expertise** with the tools they wield. It is an active system from level 1 to 400,000 and beyond, providing a deep, long-term customization vector that makes racial identity more meaningful than ever. It is the answer to the question, "You have a powerful sword, but are you *skilled* with it?"

1.8.2. Earning Mastery Points (MP)

Progression is active and based on a separate Mastery Experience system.

- **Mastery XP:** Every time a player deals damage, they earn "Mastery XP" in the category of the tool they used. Hitting with an axe grants Axe Mastery XP; casting a fire spell grants Fire Mastery XP; taking damage while wearing armor grants Armor Mastery XP.

- **Mastery XP Curve:** To ensure the system is challenging and has long-term viability, the XP required to earn the next Mastery Point follows a steep exponential curve.
 - **Formula:** $\text{MasteryXP_to_Point} = 5000 * (1.15 ^ \text{Current_Mastery_Points})$
- **Gaining Points:** Each specific mastery (e.g., Axe, Fire, Armor) has its own XP bar. When a bar is filled, the player earns **1 Mastery Point (MP)** for that specific category (e.g., 1 Axe MP, 1 Fire MP). This directly rewards players for using their chosen tools.
- **Mastery Cap:** Each individual mastery has a base cap of **100 points**. This cap can be increased through the endgame Ascension system, ensuring the system remains relevant forever.

1.8.3. The Four Core Masteries & Their Effects

There are four core categories of Mastery. Each level purchased in a mastery provides a small, permanent, and stacking bonus.

1. **Weapon Mastery:** Increases the effectiveness of a specific physical weapon type.
 - **Benefit per level:** +0.5% to Base WC of that weapon type.
2. **Spell Mastery:** Increases the effectiveness of a specific magical spell type.
 - **Benefit per level:** +0.5% to Base SC of that spell type.
3. **Armor Mastery:** Increases the defensive properties of all worn armor.
 - **Benefit per level:** +0.25% to Base AC from all equipped armor.
4. **Double Hit Mastery:** Increases the chance to strike an additional time with any attack or spell.
 - **Benefit per level:** +0.1% to Double Hit Chance.

1.8.4. Spending MP & Racial Aptitudes

A player spends their earned Mastery Points to increase the **level** of a specific mastery. However, the *cost* in MP to purchase one level is determined by their race's innate talent, or "Aptitude," for that skill. This makes racial identity a core part of the system and creates deep strategic diversity.

- **Example:** A Minotaur, born to wield axes, might only need **1 Axe MP** to buy one level of Axe Mastery. However, their unfamiliarity with swords means it would cost them **5 Sword MP** to buy one level of Sword Mastery.

Mastery Aptitude Table (MP Cost Per Level)

This table defines the MP cost for each race to purchase one level in a given mastery.

True Fighters

Race	Sword	Axe	Mace	Staff	Dagger	Claw	Bow	Armor	Dbl Hit
Human	1	N/A	N/A	N/A	N/A	N/A	N/A	2	3
Dragonborn	1	N/A	N/A	N/A	N/A	N/A	N/A	2	3
Orc	N/A	N/A	1	N/A	N/A	N/A	N/A	2	3
Werewolf	N/A	N/A	N/A	N/A	N/A	1	N/A	2	3
Minotaur	N/A	1	N/A	N/A	N/A	N/A	N/A	2	3
Troll	N/A	N/A	N/A	1	N/A	N/A	N/A	2	3
Hobbit	N/A	N/A	N/A	N/A	1	N/A	N/A	2	3
Centaur	N/A	N/A	N/A	N/A	N/A	N/A	1	2	3

True Casters

Race	Fire	Cold	Earth	Air	Arcane	Death	Drain	Armor	DbI Hit
Phoenix	1	N/A	N/A	N/A	N/A	N/A	N/A	3	3
Tiefling	1	N/A	N/A	N/A	N/A	N/A	N/A	3	3
Mermaid	N/A	1	N/A	N/A	N/A	N/A	N/A	3	3
Gnome	N/A	N/A	1	N/A	N/A	N/A	N/A	3	3
Griffin	N/A	N/A	N/A	1	N/A	N/A	N/A	3	3
Vampire	N/A	N/A	N/A	N/A	N/A	N/A	1	3	3
Elf	N/A	N/A	N/A	N/A	1	N/A	N/A	3	3
Baba Yaga	N/A	N/A	N/A	N/A	N/A	1	N/A	3	3

Hybrids

Corrected **Mastery Aptitude Table** - Hybrids

Corrected Mastery Aptitude Table - Hybrids

This table defines the Mastery Point (MP) cost for each Hybrid race to purchase one level in a given mastery.

Race	Sword	Axe	Mace	Staff	Dagger	Claw	Bow	Fire	Cold	Earth	Air	Arcane	Death	Drain	Armor	Dbl Hit
Angel	2	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	2	N/A	N/A	3	3
Aasimar	N/A	N/A	2	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	2	N/A	N/A	3	3
Banshee	N/A	N/A	N/A	N/A	2	N/A	N/A	N/A	N/A	N/A	N/A	2	N/A	N/A	3	3
Halfling	N/A	N/A	N/A	2	N/A	N/A	N/A	N/A	N/A	N/A	N/A	2	N/A	N/A	3	3
Dwarf	N/A	2	N/A	N/A	N/A	N/A	N/A	2	N/A	N/A	N/A	N/A	N/A	N/A	3	3
Demon	N/A	N/A	N/A	2	N/A	N/A	N/A	2	N/A	N/A	N/A	N/A	N/A	N/A	3	3
Draugr	N/A	N/A	N/A	2	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	2	N/A	3	3
Unicorn	2	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	2	N/A	3	3

1.9. The Alignment System

1.9.1. Design Philosophy The Alignment System is a long-term progression path reflecting a player's choices through combat. It is a scale from Benevolent (Good) to Malevolent (Evil), where players gain or lose alignment by hunting specific "Titled" special monsters. This system provides a persistent, meaningful choice that rewards dedicated playstyles with unique, stacking

bonuses and culminates in a powerful, permanent endgame choice, adding another deep layer to the "endless progression" pillar.

1.9.2. Core Mechanics A player's alignment is tracked on a numerical scale from **-25,000 (Purely Malevolent)** to **+25,000 (Purely Benevolent)**, starting at 0.

- **Altering Alignment:** Alignment is changed by defeating specific special monsters. We designate two monster titles from the Special Monster Title System as "Benevolent-aligned" and two as "Malevolent-aligned."
- **Spawn Rate:** To ensure this is a long-term grind, the chance for a special monster to be an "Alignment" type is low. The proposed rate is a **1 in 75 chance** for any monster to be Titled, with a 40% chance for that Title to be one of the four alignment types.

Alignment Monster Table

Monster Title	Alignment Act	Alignment Change
Marauder	Killing this evil creature is a "Good" act.	+1
Dreadlord	Killing this powerful evil leader is a "Good" act.	+2
Juggernaut	Killing this defensive guardian is an "Evil" act.	-1
Apex	Killing this pinnacle creature is an "Evil" act.	-2

1.9.3. Alignment Tiers & Rewards Reaching key thresholds unlocks permanent, stacking rewards. The primary gameplay bonus is a small but significant boost to the minimum and maximum **Quality Multiplier (QM)** range when a Shadow item drops.

Alignment Tier	Benevolent Title (+)	Malevolent Title (-)	Chat Color (Visual Cue)	Stacking Bonus to Shadow QM Rolls
±100	Honorable	Ruthless	Faint Blue / Red Glow	+0.5% to min/max QM
±500	Justicar	Vicious	Light Blue / Red Glow	+1.0% to min/max QM
±1,000	Guardian	Tyrant	Bright Blue / Red Glow	+1.5% to min/max QM
±2,500	Protector	Dominator	Vivid Blue / Red Glow	+2.0% to min/max QM
±5,000	Saint	Dreadlord	Glowing Blue / Red	+3.0% to min/max QM
±10,000	Luminary	Malevolent	Radiant Blue / Red	+5.0% to min/max QM
±25,000	Paragon	Anathema	Pulsing Blue / Red	+10.0% to min/max QM

1.9.4. The Capstone Choice (Endgame) Upon reaching the cap of either +25,000 or -25,000, the player makes a one-time, permanent choice to lock in a powerful endgame bonus.

- **The Paragon's Choice (+25,000)**
 - **Path of Fortune:** Gain a permanent **+10% bonus to Gem Drop Chance**.
 - **Path of Providence:** Gain a permanent **+5% bonus to Shadow Drop Chance**.
- **The Anathema's Choice (-25,000)**

- **Path of Perfection:** All Shadow items you find have their initial QM roll increased by a **flat +0.10** (e.g., the range becomes 0.85 - 1.60).
- **Path of Power:** All of your Enchantments are **10% more effective**.

1.9.5. UI/UX Implementation

- **Stats Panel:** A new bar will be added to the "Stats" tab to display the player's current alignment value and their progress on the scale.
- **Titles:** Unlocked titles (e.g., "Honorable," "Ruthless") will be available for the player to select and display next to their name.
- **Chat:** The player's name in the chat window will gain a subtle colored glow corresponding to their alignment and tier.

2. Core Coding Logic Notes

Here are high-level implementation notes for the game's most critical functions, based on the GDD.

A.) **calculateDerivedStats(player)** Function

This function should be called whenever a player's stats or gear change.

```
function calculateDerivedStats(player) {

  // 1. Calculate Base Stats from AP and Gear

  player.stats.DEX = player.baseDEX + player.gearDEX;

  // ...repeat for STR, VIT, INT, WIS

  // 2. Calculate HP and AC

  player.derivedStats.maxHP = 100 + (player.stats.VIT * 10);

  player.derivedStats.AC = player.gearAC * (1 + (player.stats.VIT * 0.0075));

  // 3. Use Archetype-Driven Logic for WC/SC (per Section 6.3)

  let primaryDamageStat;
```

```
if (player.race === 'Troll') {  
    primaryDamageStat = player.stats.VIT;  
    player.derivedStats.WC = player.gearWC * (1 + (primaryDamageStat * 0.0055));  
    player.derivedStats.SC = 0;  
} else if (player.race === 'Vampire') {  
    primaryDamageStat = player.stats.VIT;  
    player.derivedStats.SC = player.gearSC * (1 + (primaryDamageStat * 0.0055));  
    player.derivedStats.WC = 0;  
} else if (player.archetype === 'True Fighter') {  
    primaryDamageStat = player.stats.DEX;  
    player.derivedStats.WC = player.gearWC * (1 + (primaryDamageStat * 0.0055));  
    player.derivedStats.SC = 0;  
} else if (player.archetype === 'True Caster') {  
    primaryDamageStat = player.stats.WIS;  
    player.derivedStats.SC = player.gearSC * (1 + (primaryDamageStat * 0.0055));  
    player.derivedStats.WC = 0;  
} else if (player.subArchetype === 'Martial Hybrid') {  
    primaryDamageStat = player.stats.DEX;  
    player.derivedStats.WC = player.gearWC * (1 + (primaryDamageStat * 0.0055));  
    player.derivedStats.SC = player.gearSC * (1 + (primaryDamageStat * 0.0055));  
} else if (player.subArchetype === 'Mystic Hybrid') {  
    primaryDamageStat = player.stats.WIS;  
    player.derivedStats.WC = player.gearWC * (1 + (primaryDamageStat * 0.0055));  
    player.derivedStats.SC = player.gearSC * (1 + (primaryDamageStat * 0.0055));  
}
```

```
}  
  
// ... continue for Hit Chance, Crit Chance, etc.  
  
}
```

-B.) **resolveCombatTurn(player, monster)** Function

This function executes a single round of combat.

```
function resolveCombatTurn(player, monster, zone) {  
  
    // 1. Apply Zone-Specific Scaling ("Super Easy" Mechanic)  
  
    let scaledHP = monster.HP;  
  
    let scaledATK = monster.Attack;  
  
  
    // Check if zone is specialized and high-level (Layer 6+ zones)  
  
    if (zone.minLevel > 10000 && ['Gem Zone', 'Shadow Zone', 'Gold Zone'].includes(zone.type))  
    {  
  
        // Apply 0.1 to 0.2 scaling factor (10% - 20% of stats)  
  
        const scalingFactor = 0.1 + (Math.random() * 0.1);  
  
        scaledHP = Math.floor(monster.HP * scalingFactor);  
  
        scaledATK = Math.floor(monster.Attack * scalingFactor);  
  
    }  
  
  
    // 2. Calculate Player Damage (per Section 3.1 & 6.3)  
  
    let playerDamage = 0;  
  
  
  
  
  
  
  
  
    // Archetype Logic
```

```

if (player.archetype === 'True Fighter' || player.race === 'Troll') {
    playerDamage = (90 * player.derivedStats.WC) / monster.AC;
} else if (player.archetype === 'True Caster' || player.race === 'Vampire') {
    playerDamage = (90 * player.derivedStats.SC) / monster.AC;
} else if (player.archetype === 'Hybrid') {
    // Hybrid Spellstrike Calculation
    let wcDmg = (90 * player.derivedStats.WC) / monster.AC;
    let scDmg = (90 * player.derivedStats.SC) / monster.AC;
    playerDamage = (wcDmg + scDmg) * 0.8;
}

// 3. Check for Player Crit & Double Hit
// ... (Standard roll logic against player.derivedStats.critChance & doubleHitChance)

// 4. Apply Player Damage to Scaled Monster HP
scaledHP -= playerDamage;

// 5. Check if Monster is Defeated
if (scaledHP <= 0) {
    return "VICTORY";
}

// 6. Calculate and Apply Scaled Monster Damage to Player
let monsterDamage = scaledATK - (player.derivedStats.AC * 0.5);

```

```
player.HP -= Math.max(0, monsterDamage); // Ensure damage isn't negative
```

```
// 7. Check if Player is Defeated
```

```
if (player.HP <= 0) {
```

```
    return "DEFEAT";
```

```
}
```

```
}
```

Part II: Itemization and the Geminus Economy

The acquisition and enhancement of items is the primary driver of player power and the central focus of the optimization loop. The itemization system consists of four interconnected pillars: Gear, Shadows, Gems, and Enchantments.

2.1. Gear and Equipment

Gear forms the foundational layer of a player's power, providing the base stats that are then augmented by other systems. "Dropper" items are the standard, high-cost gear available for purchase in shops. They span 20 Tiers (I-XX) of power and serve two critical functions: 1) to provide a baseline of power necessary for engaging with content, and 2) to be equipped to enable the dropping of procedural "Shadow" versions of themselves, which is the core of the loot system.

2.1.1. Definitive Item Stat Calculation

The base stats of a piece of equipment (Dropper, Shadow, or Echo) are augmented by any socketed Gems and, in the case of Shadow items, inherent Enchantments. To determine an item's final contribution to a player's power, its stats must be calculated using the following formula before being summed with other equipped items.

To determine an item's final contribution to a player's power, its stats must be calculated using the following formula before being summed with other equipped items.

- **Definitive Formula:**

$$\text{FinalItemStat} = (\text{BaseItemStat} \times \text{QM}) \times (1 + \sum \% \text{StatBonuses})$$

- **BaseItemStat:** The base WC, SC, or AC of the item as defined by its Tier in **Appendix J: Master Dropper Equipment Compendium**.
- **QM:** The item's Quality Multiplier. For Dropper gear, this is always 1. For Shadow items, it is the item's current QM (0.75 to 1.5).
- **Σ%StatBonuses:** The sum of all percentage-based bonuses affecting that stat from socketed Gems and Enchantments on that specific item m. For example, a WarStone gem (+1.5% WC) and a WarStone Enchanted(+0.25% WC) would result in a sum of 0.0175.

Order of Operations: This calculation is performed for each individual piece of gear. The resulting FinalItemStat values are then used as the (Sum of... from Gear) values in the player's main derived stat formulas in Section 1.3.

2.2. The Shadow & Echo Systems: Procedural Loot

The Shadow system is the primary method of acquiring powerful, procedurally generated equipment. It transforms the static, store-bought "Dropper" gear into unique and improvable items. The base stats of any Shadow or Echo item are determined by its "Dropper" equivalent, as detailed in **Appendix J**, before the Quality Multiplier (QM) is applied.

The Shadow system is the primary method of acquiring powerful, procedurally generated equipment. It transforms the static, store-bought "Dropper" gear into unique and improvable items.

- **Shadow Creation:** There is a small, flat chance (1 in 600 kills) to create a "Shadow" version of a randomly selected equipped Dropper item.
- **Quality Multiplier:** At the moment of its creation, a Shadow is assigned a random Quality Multiplier between 0.75x and 1.5x. This multiplier is applied directly to the item's base stats (WC, SC, AC). This multiplier improves over time as the player accumulates kills while wearing that specific item, eventually reaching the maximum multiplier of 1.5x.
- **Echo Creation:** If the Shadow creation roll succeeds but the player already has a Shadow version of that same item equipped, an "Echo" is created instead. Echos are intentionally weak copies (fixed 0.5x multiplier) whose sole purpose is to be destroyed ("smashed") at the Soulforge to yield Essence.

- **Archetype System:** A Dropper can only generate items from its own Dropper Pool: Armor, Weaponry, Jewelry, or Magic.

Shadow QM Progression Formula: The QM of a Shadow item improves as the player accumulates kills while the item is equipped, eventually reaching the cap of 1.5x. This rewards long-term use of a well-rolled item.

- **Mechanic:** For every **1,000 kills** a player achieves with a specific Shadow item equipped, its QM permanently increases.
- **Formula:** $QM_Increase = 0.01$ (Note: A Shadow item with an initial QM of 1.25x would require 25,000 kills while equipped to reach the 1.5x cap.)

2.3. The Gem System

Gems are the primary vector for targeted stat customization. Their power is "snapped down" to the highest Grade Tier the player meets the level requirement for, preventing low-level players from using overpowered gems.

2.3.1. The Three Tiers of Gems

The gem system is structured into three distinct tiers of increasing power and complexity, providing a deep crafting and customization path.

1. **Standard Gems:** The foundational building blocks. These are single-stat gems that drop from monsters throughout the world. They are categorized by color for intuitive use: **Red (Fighter/Hybrid)**, **Blue (Caster)**, and **Green/Yellow (Support/Misc)**.
2. **Fusion Gems:** The second tier of gems, created by combining two specific Standard Gems of the same Grade Tier via a Stable Fusion recipe. These gems combine the effects of their two components into a single, more efficient item. Their icon is a mix of the two ingredient colors.
3. **Primal Gems:** The apex of gem crafting. These are the most powerful gems in the game, created by combining specific Standard and Fusion gems of the same Grade Tier. They offer four powerful effects, making them the ultimate goal for character optimization.

2.3.2. Core Gem Analysis for Builds

While any character can use any gem, a gem's value is determined by its interaction with the character's build. This analysis serves as a guide for build optimization, showcasing different strategic paths. The visual color-coding of gems—**Red (Fighter/Hybrid)**, **Blue (Caster)**, and **Green/Yellow (Support/Misc)**—is a core UI/UX principle to make these choices intuitive.

True Fighter (Primary Stat: DEX)

- **Maximum DPS Build:** Mightrite (+DEX), WarStone (+Base WC), Spike-Core (+Crit Chance), Siphilite (Steal DEX).
- **Durable Build:** WarHeart (Fusion), True-Lite (Fusion), Obsidian Heart (+Base AC).

True Caster (Primary Stat: WIS)

- **Maximum DPS Build:** Mindrite (+WIS), LoreStone (+Base SC), Spike-Core (+Crit Chance), Dullrite (-Enemy WIS).
- **Durable Build:** LoreHeart (Fusion), True-Rite (Fusion), Obsidian Heart (+Base AC).

Martial Hybrid (Primary Stat: DEX)

A DEX-based warrior who infuses physical attacks with magic. Their goal is to leverage their agility for both weapon and spell damage.

- **Core Damage Gems:**
 1. **Mightrite (+DEX): The God-Tier Martial Hybrid Gem.** Since DEX scales *both* their Weapon Class and Spell Class, this single gem increases their entire damage output simultaneously.
 2. **Siphilite (Steal DEX):** The perfect expression of the Martial identity. A physical debuff that weakens the enemy's martial capabilities while empowering the Hybrid.
- **Utility Gems:** Echoing-Core (+Double Hit), Vital-Core (Heals).

Mystic Hybrid (Primary Stat: WIS)

A WIS-based warrior who empowers their attacks with magical insight. Their goal is to leverage their wisdom for both weapon and spell damage.

- **Core Damage Gems:**
 1. **Mindrite (+WIS): The God-Tier Mystic Hybrid Gem.** Since WIS scales *both* their Weapon Class and Spell Class, this single gem increases their entire damage output simultaneously.
 2. **Drainrite (Steal WIS):** The perfect expression of the Mystic identity. A magical debuff that weakens the enemy's magical capabilities while empowering the Hybrid.
- **Utility Gems:** Echoing-Core (+Double Hit), Vital-Core (Heals).

- ost.

2.3.3. Gem Drop Distribution Rules

- **Base Gem Drop Chance:** 1 in 250 kills.
- **Starter Zones (Zones 1-24):** Can drop Grade Tier 1 and Grade Tier 2 gems.
- **Specialized "Pure Grade" Zones (7 Zones):** High-value zones designed for farming a single gem Grade Tier (3 through 9) with a significantly higher base drop rate.
- **Standard Progression Zones (70 Zones):** These zones follow a progressive loot system where they can drop gems of their designated maximum Grade Tier and any Grade Tier below it.

2.3.4. The Gemcutter's Workshop: Advanced Gem Management The Gemcutter's Workshop is a core crafting hub accessed via the Player Estate. It revolves on two currencies: **Gold** and **Gem Dust**. It features a dedicated **Artisan Progression System** that rewards frequent use with efficiency perks.

2.3.4.1. Socketing

- **Mechanic:** Embed gems into equipment sockets to gain statistical bonuses.
- **Artisan Perk: "Socketing Proficiency"** grants a percentage chance to socket a gem without consuming it from the inventory.

2.3.4.2. Unsocketing

- **Mechanic:** Remove gems from gear.
 - **Unsocket All (Paid):** Pay Gold to return gems to inventory.
 - **Destroy All (Free):** Remove and destroy gems for free.
- **Cost Formula:** The cost scales with the number of gems and is reduced by the **"Expert Extraction"** perk.
 - $Cost = (250 * NumGems) * (1 - PerkBonus)$

2.3.4.3. Fusing (Legacy System)

- **Mechanic:** Combine **3 identical gems** (same type and grade) to create **1 gem of the next higher grade**.
- **Cost Formula:** Gold cost scales exponentially with grade, reduced by the **"Fusing Efficiency"** perk.

- $\text{Gold Cost} = (\text{GemGrade}^2) * 10,000$

2.3.4.4. Gem Crucible (Advanced Fusing)

- **Mechanic:** Combine **2 gems of the same grade** using **Gem Dust**.
 - **Recipe Fusion:** If the pair matches a valid recipe (e.g., WarStone + Obsidian Heart = WarHeart), a specific Fusion Gem is created.
 - **Random Fusion:** If no recipe matches, a random gem of the same grade is created.
- **Cost Formula:**
 - **Random:** $\text{Gem Dust Cost} = 25 * \text{GemGrade}$.
 - **Recipe:** Specific dust cost defined per recipe (e.g., 50 Dust).

2.3.4.5. Salvaging

- **Mechanic:** Mass-convert all gems of a specific grade into **Gem Dust**.
- **Yield:** Returns a random amount of Gem Dust per gem based on its grade (e.g., Grade 1 returns 1–4 Dust).
- **Artisan Perk: "Salvaging Clarity"** increases the dust yield amount.
- **Restriction:** Mass salvaging high-grade gems (Grade 9) requires specific Player Levels (e.g., Level 200,000).

2.3.4.6. The Artisan Progression System A skill-based level system for the workshop. Performing actions grants **Artisan XP**, earning levels that grant **Perk Points** to spend on the perks listed above.

- **Leveling Formula:** $\text{XP_Required} = 100 * (1.5 ^ {(\text{Current_Artisan_Level} - 1)})$.
- **XP Gains per Action:**
 - **Socket:** 10 XP
 - **Unsocket:** 5 XP
 - **Fuse / Crucible:** 25 XP
 - **Salvage:** 2 XP

2.4. The Enchantment System

Enchantments are powerful magical properties that are procedurally generated directly onto Shadow gear at the moment of its creation. Unlike gems, they cannot be added or removed.

- **Generation:** The number of enchantments a Shadow spawns with (0 to 4) is determined by its initial Quality Multiplier.
- **Tiering:** The power of these enchantments (I to IX) is determined by the level of the zone in which the Shadow item dropped.
- **Rarity:** The chance for a dropped Shadow to have an enchantment is not guaranteed and is based on the player's level range.

Enchantment Count by Quality Multiplier: The number of enchantments a Shadow item is generated with is determined by its initial QM roll. Higher quality items are guaranteed to have more magical properties.

Enchantment Name	Effect(s)	Tier 1-9 Values (%)
Caster		
LoreStone Enchanted	Increase Spell Class	0.25, 0.5, 0.5, 1, 1.25, 2, 3.25, 4, 5
LoreHeart Enchanted	Inc. Base SC & Inc. Base AC	SC: 0.25-3.75 AC: 0.25-5
True-Rite Enchanted	Inc. Hit Chance & Dec. Enemy WIS	Hit: 0.75-7.5 -Wis: 2-7.5
Mindrite Enchanted	Increase WIS	1.25, 1.875, 2.5, 3.125, 3.75, 5, 7.5, 10, 12.5
Sanguine-Heart Enchanted	Inc. VIT & Inc. Base SC	VIT: 0.6, 0.9, 1.25, 1.5, 1.8, 2.5, 3.75, 5, 6.25 SC:

		0.1, 0.25, 0.35, 0.6, 0.8, 1.25, 1.6, 2, 2.5
Fighter		
WarStone Enchanted	Increase Weapon Class	0.25, 0.5, 0.75, 1.25, 1.75, 2.5, 3.25, 4, 5
WarHeart Enchanted	Inc. Base WC & Inc. Base AC	WC: 0.25-3.75 AC: 0.25-5
True-Lite Enchanted	Inc. Hit Chance & Dec. Enemy DEX	Hit: 0.75-7.5 -Dex: 2-7.5
Mightrite Enchanted	Increase DEX	1.25, 1.875, 2.5, 3.125, 3.75, 5, 7.5, 10, 12.5
Juggernaut's Eye Enchanted	Inc. VIT & Inc. Base WC	VIT: 0.6, 0.9, 1.25, 1.5, 1.8, 2.5, 3.75, 5, 6.25 WC: 0.1, 0.25, 0.35, 0.6, 0.8, 1.25, 1.6, 2, 2.5
Support		
Obsidian Enchanted	Increase Armor Class	0.25, 0.5, 0.75, 1.25, 1.75, 2.5, 3.25, 4, 5
Spike-Core's Enchanted	Increase Crit	0.25, 0.625, 1.25, 1.875, 2.5, 3.125, 3.75, 4.375, 5
True-Core's Enchanted	Increase Hit	0.75, 1.5, 2.25, 3, 3.75, 4.5, 5.25, 6.25, 7.5

Vital-Core's Enchanted	Increase Vitality	1.25, 1.875, 2.5, 3.125, 3.75, 5, 7.5, 10, 12.5
Blood-Core's Enchanted	Steal Enemy Health	1, 1.5, 2.25, 3.75, 6.25, 10, 12.5, 15, 18.75

| Initial Quality Multiplier (QM) | Number of Enchantments
| | :--- | :--- | | 0.75x - 0.99x | 0 - 1 | | 1.00x - 1.24x | 1 - 2 | |
1.25x - 1.49x | 2 - 3 | | 1.50x (Perfect Roll) | 4 (Guaranteed)
|

2.5. The Accessory System

Accessories are unique, powerful items that are equipped in their own dedicated 12th gear slot. Unlike standard jewelry (Rings and Necklaces) which provide primary stat bonuses, Accessories grant game-changing mechanical effects, such as boosting drop rates, altering core character stats, or providing entirely new passive abilities.

They are acquired through two distinct methods: as high-cost gold sinks from endgame shops or as rare, build-defining drops from specific Zone Bosses. This creates both a consistent economic drain for established players and a compelling reason to hunt specific content. A full list of all available accessories, their acquisition methods, and their effects is detailed in Appendix F: Master Accessory Compendium.

2.5.1. The Jewelry System (Rings & Necklaces)

Accessories (Rings and Necklaces) provide unique and powerful bonuses that often cannot be obtained through other gear slots. They are available in 20 tiers of power, providing a mix of HP%, flat Heal Per Turn, and Critical Hit Chance %. REFER TO Ring and Necklace APPENDIX BOTTOM OF PAGE.

2.6. Core Economic Principles and Loops

The game's economy is a closed loop. The primary sinks are the exponentially increasing cost of tiered Dropper gear, powerful shop-bought accessories, fees for clan creation and trading, and the substantial costs associated with upgrading buildings in the Player Estate and perfecting gear in the Soulforge.

- **Pricing Formula:** $\text{Cost} = \text{BasePrice} * (1.75 ^ (\text{ItemTier} - 1))$

Part III: Combat and World Systems

3.1. Combat Mechanics and Definitive Formulas

The combat system is fast-paced, deterministic, and strategically deep. Combat is turn-based and automated after the player initiates an encounter.

- **Design Rationale:** The asymmetry in damage formulas is a deliberate design choice. Player damage is reduced by the monster's Armor Class via division, making monster AC highly effective. Conversely, monster damage is reduced by the player's AC via subtraction, a much less effective method. This makes VIT and AC crucial stats for "Pushers" (under-geared players) but less critical for "Farmers" (optimally-geared players who kill before being hit), reinforcing the core loop.
- **Player Damage vs. Monster:** $\text{Player Damage} = (90 * \text{Player_WC/SC}) / \text{Monster_AC}$
- **Monster Damage vs. Player:** $\text{Monster Damage} = \text{Monster_Attack} - (\text{Player_AC} * 0.5)$

3.2. Monster Design and Hierarchy

3.2.1. Monster Tier Definitions

- **Basic:** The standard enemy of a zone, designed for high-KPM farming.
- **Elite:** A rarer, more powerful version of a basic monster with increased rewards (1.5x XP, 10x Gold).
- **Zone Boss:** A unique, powerful monster that serves as the capstone of a zone.

3.2.2. Monster Scaling Formulas

A. Standard Scaling (XP Zones & Low-Tier Zones) The following formulas apply to all standard XP zones and any specialized zone with a Minimum Level requirement below 10,000.

- **Final HP:** $\text{BaseHP} * (1.20 ^ (\text{GearTier} - 1))$

- **Final AC:** $\text{BaseDEF} * (1.20 ^ {(\text{GearTier} - 1)})$
- **Final Attack:** $\text{BaseATK} * (1.22 ^ {(\text{GearTier} - 1)})$
- **Final XP/Gold:** $\text{BaseReward} * (1.27 ^ {(\text{GearTier} - 1)})$

B. Specialized Zone Scaling ("Super Easy" Mechanic) To facilitate the "Optimize" phase of the core loop, specialized farming zones (Gem, Shadow, Gold) with a **Minimum Level > 10,000** apply a massive reduction modifier to monster stats. This enables high-KPM farming for well-gearred players.

- **Eligibility:** Zone Type is NOT "Standard" **AND** Zone Min. Level > 10,000.
- **Scaling Factor:** A random value between **0.10** and **0.20** (10% to 20%).
- **Modified Formulas:**
 - **Reduced HP:** $\text{StandardCalculatedHP} * \text{ScalingFactor}$
 - **Reduced Attack:** $\text{StandardCalculatedAttack} * \text{ScalingFactor}$
 - **Note:** XP and Gold rewards remain at their full, unreduced values to maximize farming efficiency.

3.2.3. Special Monster Title System

Any non-boss monster has a chance to spawn with a special title, granting it unique properties and enhanced rewards. These encounters are designed to intentionally break the monotony of high-KPM grinding. (See Appendix C for the full table of titles and effects).

3.3. The World of Geminus: Zone Structure and Taxonomy The game world consists of 101 unique zones. To drive the "Grind, Grow, Advance, Optimize" loop, these zones are categorized into four distinct archetypes, each with specific drop rates and mechanical adjustments.

3.3.1. Zone Taxonomy

- **XP Zones (Standard Grind):** These zones offer steady combat and standard drop rates. They are the baseline for leveling.
 - **Zone IDs:** Z01–Z24 (Starters), Z26–Z33, Z36–Z99.
 - **Drop Rates:** Shadow Items (1 in 600), Gems (1 in 400).
 - **Gem Grading:** Gems dropped here scale naturally with Zone Level (e.g., Z26 drops Grade 1–2; Z99 drops Grade 1–9).
- **Gem Zones (Targeted Farming):** Specific zones designed to farm exact Gem Grades.
 - **Mechanic:** These zones feature a significantly enhanced Gem Drop rate of **1 in 100** (vs standard 1/400).

- **Zone Assignments:**
 - **Z34:** Grade 3
 - **Z51:** Grade 4
 - **Z59:** Grade 5
 - **Z66:** Grade 6
 - **Z72:** Grade 7
 - **Z79:** Grade 8
 - **Z87:** Grade 9
- **Shadow Zones (High-Stakes Loot):** Zones specifically tuned for acquiring Shadow Items.
 - **Mechanic:** Shadow Drop rates improve significantly in higher-tier Shadow Zones. Gems drop at 1 in 100 here.
 - **Zone Assignments:**
 - **Z25:** 1 in 500 Shadow Chance
 - **Z60:** 1 in 400 Shadow Chance
 - **Z80:** 1 in 300 Shadow Chance
 - **Z100:** 1 in 200 Shadow Chance
- **Gold Zones (Economic Spikes):** Zones that provide massive economic injections, aligned with major Gear Tier upgrades.
 - **Mechanic:** Monsters in these zones award **5x Gold Rewards**.
 - **Zone Assignments:** Z27, Z35, Z47, Z65, Z77, Z85, Z91, Z95, Z101.

3.3.2. Specialized Zone Scaling ("Super Easy" Mechanic) To reward players who optimize their builds to break through "Grind Walls," high-level specialized zones (Gem, Shadow, and Gold zones, specifically Z87 and Z100+) feature a unique scaling modifier.

- **The Modifier:** Monsters in these specific farming zones have their **HP and Attack reduced to 10%–20%** of the expected values for their level.
- **Purpose:** This allows "Farmers" to achieve extreme Kills Per Minute (KPM) efficiency, turning these zones into rapid-fire slot machines for loot and resources.

3.3.3. Zone Boss Mechanics

- **Progression Gate:** A player must defeat the Zone Boss of their current zone at least once to unlock the ability to travel to the next tier of zones.

- **First-Kill Milestone:** The first time a player defeats a specific Zone Boss, they receive a massive one-time reward bonus (10x XP, 1000x Gold).
- **Daily Encounter:** After the first kill, the Zone Boss becomes a daily repeatable encounter, providing rewards equivalent to an Elite monster.

3.5. Death & Revival: The Sanctuary The Sanctuary is the hub for player revival. It introduces meaningful consequences for defeat, differentiating between PVE and PVP deaths.

3.5.1. Death Types & Consequences

- **PVE Death (Player vs. Environment):** Triggered by NPCs or hazards. The player faces a choice upon revival:
 - **Choice 1: The Penitent's Path:** Accept the standard penalty immediately.
 - **Penalty:** Loss of **100% of held Gold** and **100% of current XP** towards the next level.
 - **Choice 2: The Echo's Bargain:** Defer the penalty.
 - **Outcome:** You retain all Gold and XP, but the amounts that *would have been lost* are converted into **Soul Debt**.
- **PVP Death (Player vs. Player):** Triggered by another player.
 - **Consequence:** The consequences are absolute. Held Gold is claimed by the victor. The defeated player **must** take the Penitent's Path (100% XP loss) to revive. No Soul Debt is available.

3.5.2. The Soul Debt System If a player chooses "The Echo's Bargain," they accrue Debt.

- **The Tithe:** While carrying Soul Debt, a **50% Tithe** is applied to all future Gold and XP gains. 50% of earnings go to you, 50% go to paying down the debt automatically.
- **Active Repayment:** Players can visit the Sanctuary to pay down debt manually using Gold from their **Gilded Vault**.

Part IV: Player Engagement Systems

4.1. The Quest System: Streaks and Bounties

The quest system provides a structured alternative to pure grinding, offering significant rewards to players who can complete objectives efficiently via the "Quest Streak" mechanic. (See Appendix G for full quest list).

4.2. Social Framework: Clans & Player Estates

- **Clans:** Player-run organizations that offer shared resources and powerful, scaling bonuses.
- **Player Estates:** A personal, instanced area that serves as a base of operations with constructible buildings.

4.2.1. The Clan System

4.2.1.1. High-Level Overview

- **Concept:** The Clan System is a core social and progression feature that enables players to create and join persistent groups known as Clans. It is designed to be a center for cooperative gameplay, long-term advancement, managing resources, and competing for territory. Clans offer members substantial combat and economic advantages, fostering community and providing a compelling endgame loop.
- **Core Pillars:**
 - **Collaborative Building:** Clans construct and enhance a mutual headquarters, the Bastion, which unlocks potent clan-wide benefits.
 - **Territory Control:** Clans vie for control over zones on a persistent World Map, securing exclusive resources and strategic benefits.
 - **Shared Economy:** Clans oversee a collective Treasury and Vault, enabling members to pool resources and share valuable items to strengthen the group.
 - **Social Hierarchy & Management:** A detailed system of roles and permissions facilitates organized leadership, recruitment, and clan moderation.

4.2.1.2. Core Systems & Mechanics

4.2.1.2.1. Clan Formation & Management

- **Creation:**
 - Any player not currently in a clan can establish a new one.
 - The cost to create a clan is 100,000 Gold.
 - The clan's founder is automatically designated as the Leader.
- **Membership:**
 - Players have the ability to apply to join clans that already exist.

- Clan leadership, including Leaders and Officers, can approve or deny these applications.
- Members can depart from a clan at their discretion, and Leaders have the authority to remove members.

- **Roles & Permissions:**

- **Leader:** Possesses complete control over all clan functions, including recruitment, promotions, resource management, tax rate settings, bonus activation, and capital settlement.
- **Officer (Future):** Will have the ability to handle recruitment and moderate members.
- **Member/Initiate:** Holds basic membership with access to clan benefits but lacks management permissions.

4.2.1.2.2. The Bastion: Clan Headquarters

The Bastion serves as the clan's primary base of operations and is visualized as an instanced hex grid for constructing and upgrading buildings.

- **Building & Upgrading:**

- Buildings are placed on specific hex plots inside the Bastion.
- Upgrades have a real-time construction timer and require specific resources: Gold for PvE buildings and War Materials for PvP buildings.
- Construction timers continue to run even when players are offline.

- **List of Buildings:**

- **Great Hall (Core):** The central structure whose level determines the maximum level for all other buildings. It also unlocks the Clan Power Bonus system.
- **Force of Friendship (PvE):** Grants flat increases to combat stats for all clan members.
- **Tracker Academy (PvE):** Boosts the spawn rate of special, high-value monsters in the game world.
- **Black Market (PvE):** Provides a percentage-based bonus to all Gold that members earn from selling items.
- **Clan Mine (PvE):** Activates the "Hunter's Quarry" system, which gives members a small chance to find a rare Gem on each kill. This chance improves with the building's level and features bad luck protection.

- **Bastion Walls (PvP):** Enhances the defensive stats of clan members during combat within their own territory.
- **War Camp (PvP):** Enhances the offensive stats of clan members during combat in enemy territory.

4.2.1.2.3. World Map & Territory Control

This is a persistent, shared map where clans can establish their influence.

- **Zones & Territories:** The map is segmented into large Zones, which are further divided into smaller Territories. The clan that controls a Zone receives a unique and powerful strategic bonus.
- **Settling a Capital:**
 - A new clan is required to establish a capital to start controlling territory.
 - The Clan Leader must go to an unclaimed territory and use the "Settle Capital" command.
 - Once settled, the clan instantly gains control over the entire Zone linked to that territory.
 - A clan is limited to only one capital.
- **Resource Nodes:**
 - The world map features harvestable nodes that provide War Materials.
 - Only members of the clan owning the territory can harvest these nodes.
 - Harvesting a node depletes it, and it will later respawn in a random spot within the same biome type.

4.2.1.2.4. Clan Economy & Resources

- **Treasury (Fungible Resources):**
 - **Gold:** Primarily funded via a Clan Tax. The Leader sets a percentage of Gold from members' loot sales that is automatically sent to the treasury.
 - **War Materials:** Collected from resource nodes on the world map and are used for upgrading PvP-oriented buildings.
- Tier 1: Heartwood Log, Quarry Stone.
- Tier 2: Siege-Grade Timber, Fortress Granite.

- Tier 3: Bloodsteel Ingot, Adamant Ore.
- **Vault & Ledger (Non-Fungible Items):**
 - **Inventory:** Members can contribute items like Gems from their personal storage to the shared clan vault.
 - **Requests:** Members can ask for an item from the vault, with requests needing approval from leadership.
 - **Ledger:** All significant economic events are automatically recorded in a timestamped ledger to ensure transparency.

4.2.1.2.5. Clan Progression & Bonuses

- **Clan Power:**
 - This metric represents the clan's overall strength.
 - It is calculated by summing the levels of all its members.
- **Power-Based Bonuses:** As a clan achieves certain Total Power milestones, it permanently unlocks passive bonuses like "+2% Armor".
- **Active Bonus:**
 - From the unlocked bonuses, the Clan Leader can select one to be the active bonus for the clan at any given time.
 - This enables clans to adjust their main buff according to their current goals.

4.2.1.3. UI & Player Experience Flow

- **Clan Hub:** This is the main interface for all clan-related actions and is accessible from the primary game UI.
 - **No Clan View:** This view will prompt a player to either create a new clan or browse and apply to existing ones.
 - **Clan Member View:** A tabbed interface gives members access to the following:
 - **Roster:** View all clan members, their roles, and levels.
 - **Inventory:** Donate to and request items from the clan vault.
 - **Ledger:** View the log of all clan activities.
 - **Applicants:** (For Leaders/Officers) Manage new applications to the clan.

- **Settings:** (For Leaders) Adjust the clan tax rate.
- **World Map:** On the world map, players can view territory ownership marked by color-coded hexes. Tooltips display details about territories, their bonuses, and the clans that own them.
- **Bastion:** A player can enter their clan's Bastion from their capital's hex on the world map. Interacting with a building plot will open an upgrade window showing costs, timers, and benefits

4.3. Commerce: The Black Market & P2P Trading

- **The Black Market (Auction House):** An asynchronous marketplace for auctions and buyouts.
- **Player-to-Player (P2P) Trading:** A secure interface for direct trades between two online players.

4.3.1. The Armory (NPC Vending)

4.3.1.1. Overview The Armory is the main in-game shop for purchasing, selling, and managing equipment. It functions as the central hub for gear progression, offering players a direct method to enhance their power by using in-game currency. The design focuses on a clear and intuitive interface that provides all necessary details for informed purchasing, such as direct comparisons with the player's currently equipped items.

4.3.1.2. Core Features

- **Buy Mode:** Players can browse and acquire a diverse selection of equipment. The items are sorted by Category (e.g., Weapons, Armor), Type (e.g., Sword, Helmet), and Tier (1-20).
- **Sell Mode:** Players are able to sell items from their inventory for 25% of the item's base cost. To safeguard valuable gear from being sold by mistake, items can be "locked". Any item currently equipped is automatically locked. A "bulk-sell" feature is available for managing inventory efficiently.
- **Buyback Mode:** The five most recently sold items can be repurchased from the vendor for the same price they were sold for. This serves as a safeguard against accidental sales.
- **Upgrade Advisor:** This is an automated feature that analyzes the shop's stock to recommend the most substantial upgrades available for the player's current gear, considering their level and gold. Its purpose is to direct players towards meaningful progression choices.

- **Item Examination:** Players can inspect any item to view its detailed statistics, level requirements, price, and a direct stat-for-stat comparison with the item they have equipped in the same slot.

4.3.1.3. User Interface & User Experience (UI/UX)

- **Layout:** A three-panel layout is used for maximum clarity.
 - **Top Panel (Controls):** Features tabs to switch between Buy, Sell, and Buyback modes, along with the player's total gold and selection dropdowns.
 - **Middle Panel (Lists):** Shows the item list for selling, the Upgrade Advisor's recommendations, or the buyback list.
 - **Bottom Panel (Item Display):** Displays the detailed "examine" view for a selected item.
- **Visual Feedback:**
 - **Stat Comparison:** Differences in stats are color-coded; green (+) for upgrades and red (-) for downgrades.
 - **Equippability:** Items that the player does not meet the level requirement for are distinctly marked in red.
 - **Racial Specialization:** Items corresponding to the player's racial specialization are highlighted with a special glow.
 - **Affordability:** The purchase button is grayed out and disabled if the player does not have enough gold.

4.3.1.4. Itemization & Economy

- **Currency:** Gold is the only currency accepted and used in The Armory.
- **Item Tiers:** Equipment is available from Tier 1 to Tier 20. Higher tiers provide substantially better stats but come with increased costs and level requirements.
- **Cost Scaling:** An item's cost is determined exclusively by its tier, using an exponential formula to create a balanced gold sink throughout the game.
 - Formula:

$$\text{Cost}(\text{tier}) = 50000 \times 1.75^{(\text{tier}-1)}.$$
- **Stat Scaling:** An item's primary statistic (WC or AC) scales with its tier.
 - Formula:

$$\text{StatValue}(\text{tier}) = 13 \times 1.22^{(\text{tier}-1)}.$$

- **Proportionality:** Different armor slots receive a specific percentage of the base AC value for their tier (e.g., Chest receives 100%, Gloves receive 50%).

- **Item Categories & Types:**

- **Weapons:** Axe, Bow, Claw, Dagger, Mace, Staff, Sword.

- **Armor:** Helmet, Gloves, Chest, Leggings, Boots.

- **Jewelry:** Ring, Necklace.

- **Gem Slots:** All equipment from Tier 1 through 20 comes with 2 gem slots, ensuring this utility is available at all gear levels.

4.3.1.5. Player Progression & Specialization

- **Level Requirements:** Each tier of equipment has a minimum player level requirement for it to be equipped. This system gates progression and links gear power directly to the character's advancement.

- **Racial Specializations:** Specific races possess a natural proficiency with certain weapon types (e.g., Dwarves with Axes). While the precise mechanical bonus is not defined, the user interface must highlight these specialized items to the player. This design choice is meant to encourage thematic character development.

4.3.2. The Arcanum (Magic Shop) The Arcanum is the centralized shop for purchasing Spells, Buffs, and Artifacts. Unlike the Armory, which deals in physical gear, the Arcanum focuses on magical progression.

- **Inventory:**

- **Spells:** Damage-dealing scrolls for Casters and Hybrids (e.g., Fire, Cold, Arcane).

- **Buffs:** Utility spells for Fighters (e.g., Warcries, Banners).

- **Artifacts:** High-cost, unique items with fixed stats (no tiers).

- **Racial Affinity:** Items that match the player's Racial Specialization (e.g., Fire spells for a Phoenix) are visually highlighted to guide purchasing decisions.

- **Economy:**

- **Pricing:** Follows the same exponential tier curve as the Armory: $\text{Cost} = 50,000 * 1.75^{(\text{Tier}-1)}$.

- **Resale:** Items can be sold back for 25% of their purchase price.

4.4. The Gilded Vault Network

This is the in-game banking system, providing secure storage and advanced financial tools.

- **Core Components:**
 - **The Grand Vault:** The central bank building.
 - **Aetherium Conduit:** Remote access points (ATMs).
 - **Vault Sigil:** The player's debit card for accessing their funds.
- **Advanced Features:**
 - **Merchant's Writ:** A high-risk line of credit for established players (unlocked at Lv. 50). Failure to repay results in a "Debtor's Curse" debuff.
 - **Venture Charters:** A gold sink allowing players to invest in NPC-managed ventures for a potential return.
 - **Guild Treasuries:** Shared clan vaults with permissions and transaction logs.

The Gilded Vault Network-Details

4.4.1. Feature Overview

The Grand Vault is a central banking and financial hub within the game, created to manage player and guild assets, support economic activities, and offer late-game gold sinks and investment avenues. It provides secure storage for the player's main currency, "Gold," and includes advanced financial services that are unlocked as the player progresses. The entire feature is accessible through a single, multi-tabbed interface located at a specific in-game location, such as a capital city.

4.4.2. Core Mechanics & Systems

The Grand Vault is built from several interconnected modules, which can be accessed through an accordion-style navigation menu.

4.4.2.1. Personal Vault

- **Function:** To securely store and retrieve Gold. This is the fundamental feature of the vault.
- **Mechanics:**
 - **Deposit:** Allows players to move Gold from their "Pocket" (on-hand currency) into the "Vault". There is no storage limit.

- **Withdraw:** Allows players to move Gold from the "Vault" back to their "Pocket".
- **UI:** The interface shows both "Pocket Gold" and "Vault Gold". It includes a number input field, quick-fill percentage buttons (10%, 25%, 50%, 75%, MAX), and distinct "Deposit" and "Withdraw" buttons.

4.4.2.2. Merchant's Writ (Credit System)

- **Function:** A system for credit and loans aimed at high-level players.
- **Unlock Requirement:** Player must be Level 50 or higher.
- **Mechanics:**
 - **Credit Limit:** A player's credit limit is determined by factors such as their level, total assets, or game achievements.
 - **Borrow:** Players can borrow Gold up to their credit limit. The borrowed money is added directly to their "Pocket Gold".
 - **Debt:** The amount borrowed is recorded as the player's "Debt".
 - **Repay:** Debt can be repaid at any time using "Pocket Gold".
 - **Interest (Future Scope):** An interest rate, calculated daily, could be applied to outstanding debt to act as a passive gold sink.
 - **Penalties (Future Scope):** Failing to repay debt could lead to temporary debuffs like a "Debtor's Curse" or loss of access to other financial services.

4.4.2.3. Venture Charters (Investment System)

- **Function:** A high-risk, high-reward system where players can invest Gold from their Vault into time-based ventures.
- **Mechanics:**
 - **Available Ventures:** Players are shown a list of investment options, each with a specific Cost, Duration, Risk Level, and potential Return on Investment (ROI) range.
 - **Investment:** Gold is invested directly from the player's Vault. A player must have sufficient funds and can only have one of each type of venture active simultaneously.
 - **Active Ventures:** After investing, the venture is displayed in an "Active" section with a real-time countdown timer.

- **Completion:** When the timer finishes, the initial investment plus or minus the profit/loss is automatically returned to the player's Vault. The final return is randomly calculated within the venture's specified ROI range.

- **Example Ventures:**

- **Low Risk:** "Caravan Escort" - Features a low cost, short duration, and a small but dependable positive ROI.

- **High Risk:** "Sunken City Expedition" - Features a high cost, long duration, and a wide ROI range that includes the possibility of a loss.

4.4.2.4. Guild Treasury

- **Function:** A shared bank for guild funds, with access managed by guild rank.

- **Mechanics:**

- **Shared Balance:** A single, shared Gold pool for the entire guild.

- **Deposit:** Any member of the guild can deposit Gold from their "Pocket" into the Treasury.

- **Withdrawal Permissions:**

- **Member:** Cannot withdraw.

- **Officer:** Can withdraw up to a daily limit.

- **Leader:** Can withdraw without any limit.

- **Transaction Log:** A log is available to view the last 10-20 transactions, showing the player, action, amount, and a timestamp for transparency.

4.4.2.5. Public Network Modules

- **Aurum Exchange:** A read-only display that shows the changing market values of high-end commodities that are not Gold (e.g., rare crafting materials). This acts as a market ticker to help players make informed trading decisions.

- **Bounty Board:** A list of contracts that players can accept. These bounties might target "enemy" NPCs or other players with high debt, linking the credit system to gameplay content. Accepting a bounty could start a quest or flag a player for PvP.

- **Remote Access:** A feature that can be unlocked through a significant game achievement. Once unlocked, it allows the player to access their Vault interface from their Player Estate, removing the need to travel to the bank's physical location.

4.4.3. UI & UX Flow

- **Layout:** A two-column layout in a fixed-size panel, designed for a mobile-first experience.
 - **Left Column:** A navigation rail (1/3 width) uses an accordion menu to group "Personal" and "Public" services. Clicking a service activates it.
 - **Right Column:** The content area (2/3 width) displays the interface for the selected service.
- **Theme:** The aesthetic is high-fantasy, designed to feel "grand" and "secure". It uses a dark color palette with gold and orange accents, along with thematic fonts for titles.
- **Interactivity:**
 - Buttons are clearly labeled and will change state (e.g., become disabled) if an action cannot be performed.
 - Input fields are large and user-friendly.
 - A "toast" notification system at the top of the screen provides unobtrusive feedback for events like a completed venture.
 - All financial figures are formatted with commas to improve readability (e.g., 1,234,567)

Part V: The Endgame: The Path to Ascension

5.1. The Soulforge: Advanced Crafting The Soulforge is the endgame engine for upgrading Shadow and Echo items.

5.1.1. Core Actions

- **Infusion:** Increases an item's primary stat (WC/SC/AC) by a fixed percentage. Cost scales exponentially with the item's Infusion Level (+1, +2, etc.).
- **Rerolling:** Replaces one secondary enchantment on a Shadow item with a new random one.
- **Ascension:** The ultimate upgrade for items with high Infusion levels (+10). Requires **Primal Souls**.
 - **Effect:** Massive stat boost, unique visual glow, and the item becomes permanently bound (cannot be modified further).
- **Shattering:** Destroys Shadow/Echo items to yield **Essence**, the fuel for the Soulforge.

5.1.2. Critical Success System Every action has a **5% base chance** to be a Critical Success.

- **Infusion:** Double the stat gain.
- **Reroll:** Resource cost refunded.
- **Ascension:** Primal Soul cost refunded.
- **Shattering:** Double Essence yield.

5.1.3. Crafting Mastery A persistent progression track. Performing Soulforge actions grants **Mastery XP**.

- **Benefit:** Higher Mastery levels provide passive bonuses, such as reduced Gold/Essence costs and increased Critical Success rates.

Part V: The Endgame: The Path to Ascension

5.1. The Soulforge: Advanced Shadow Upgrades

5.1.1. Feature Overview

- **Concept:** The Soulforge is a fundamental endgame crafting system that offers a deep and satisfying progression path for player equipment. It enables players to upgrade, customize, and salvage their high-tier items, serving as a long-term resource sink and a primary driver for character power growth beyond standard item drops.
- **Player Experience Goals:**
 - **Meaningful Progression:** Provide players with a clear and engaging way to improve their best gear, making their items feel unique and personalized.
 - **Strategic Choices:** Create interesting decisions regarding resource management, such as whether to invest heavily in one exceptional item or to distribute resources across several pieces of gear.
 - **Excitement & Anticipation:** Generate high-stakes crafting moments via the "Critical Success" system to deliver exciting and valuable outcomes.
 - **Economic Sink:** Establish a renewable sink for both common and rare currencies to help manage and regulate the in-game economy.
- **Core Loop:**
 - **Acquire:** Players get eligible 'Shadow' and 'Echo' items through gameplay.
 - **Evaluate:** Players determine if an item is worth upgrading or should be salvaged for materials.

- **Invest:** Players use resources at the Soulforge to perform one of the core crafting functions.
- **Outcome:** The item is either enhanced, altered, or destroyed for resources. This result feeds back into the loop, either by yielding an upgraded item or by providing materials for the next crafting attempt.

5.1.2. Core Crafting Systems The Soulforge features four primary actions, each with a specific role in the item's lifecycle.

- **5.1.2.1. Infusion**

- **Purpose:** To increase the raw power of an item, serving as the main method for direct stat improvement.
- **Action:** Boosts an item's main stat (e.g., WC, AC, SC) by a set percentage.
- **Eligible Items:** 'Shadow' and 'Dropper' items.
- **Restrictions:** Cannot be used on 'Ascended' items.
- **Cost:** Requires Gold and Essence, with the cost scaling exponentially with each successful Infusion on an item.

- **5.1.2.2. Rerolling**

- **Purpose:** To customize an item's secondary enchantments, letting players aim for a perfect combination of stats.
- **Action:** Replaces a selected secondary stat with a new, random one from the item's available enchantment pool.
- **Eligible Items:** 'Shadow' items.
- **Restrictions:** Cannot be used on 'Ascended' items. The new stat cannot be a duplicate of an existing one on the item.
- **Cost:** A large flat fee of Gold and Essence, determined by the item's tier.

- **5.1.2.3. Ascension**

- **Purpose:** The ultimate, one-time upgrade that "finalizes" an item, transforming it into a legendary artifact.
- **Action:** Permanently changes a highly-infused item into an 'Ascended' version.

- **Eligible Items:** 'Shadow' items that have reached a minimum Infusion level, such as +10.

- **Outcome:**

- The item's main stat gets a massive, one-time increase (e.g., +50%).
- The item becomes permanently 'Ascended'.
- The item acquires a unique visual effect, like a glowing border.
- The item can no longer be Infused, Rerolled, or Shattered and becomes permanently bound.

- **Cost:** An extremely high cost of Gold, Essence, and the rare currency **Primal Souls**.

- **5.1.2.4. Shattering**

- **Purpose:** To salvage unwanted items and convert them into a vital crafting resource.

- **Action:** Destroys an item.

- **Eligible Items:** 'Shadow' and 'Echo' items.

- **Restrictions:** Cannot be used on 'Ascended' items.

- **Outcome:** The item is permanently destroyed, and the player receives a base amount of **Essence**. The amount is based on the item's tier and type, with 'Shadows' yielding more than 'Echoes'.

5.1.3. Special Systems

- **5.1.3.1. Critical Success**

- This is a chance-based mechanic that adds excitement to crafting.

- **Trigger:** Every crafting action has a small, flat chance (e.g., 5%) to result in a "Critical Success".

- **Feedback:** The player is notified by a prominent visual and audio cue.

- **Bonus Outcomes:**

- **Infusion:** The stat increase is significantly larger (e.g., double the normal bonus).

- **Rerolling:** The resource cost is completely refunded.

- **Ascension:** The rare **Primal Soul** cost is refunded.

- **Shattering:** The amount of Essence gained is doubled.

- **5.1.3.2. Crafting Mastery**

- This is a persistent progression system that rewards repeated engagement with the Soulforge.
- **Progression:** Players earn a small amount of Mastery XP for each crafting action they perform. Critical Successes provide a large XP bonus.
- **Levels:** Gaining enough XP increases the player's Crafting Mastery level.
- **Rewards:** Each level provides small, permanent passive bonuses, such as minor cost reductions, a slight increase in Critical Success chance, or unlocking exclusive cosmetic item appearances at certain milestones.

5.1.4. Resources & Currencies

- **Gold:** The common currency obtained from all standard gameplay.
- **Essence:** A crafting-specific currency primarily acquired by **Shattering** items. It is the main gate for most Soulforge actions.
- **Primal Souls:** A premium and rare currency needed for **Ascension**. It is obtained from the most challenging content (like raid bosses) and may be available in a premium cash shop.

5.2. The Prestige Loop: Requirements & Consequences of Ascension

The Path to Ascension is the game's prestige system. The final zone, Z101 "The Echoing Gorge of Lost Souls," serves as the ultimate gear-check and the final, mandatory step before a player can Ascend.

Part VI: Technical Implementation & Data Schemas

6.1. Core Data Structure Blueprints

```
const gameData = {  
  // Defines all racial base stats and weights for leveling up  
  races: {  
    dwarf: { class: 'Hybrid', weights: { str: 12, dex: 8, vit: 10, ntl: 12, wis: 18 } },
```

```

//... all 24 races defined here
},
// Defines the base stats for each of the 20 gear tiers
gearTiers: {
  scalingFactor: 1.75,
  tiers: [/*... array of tier objects... */]
},
// Defines all enchantments and their scaling values per tier
enchantments: {
  warstone_enchanted: { name: 'WarStone Enchanted', values: [0.25, 0.5, 0.75, 1.25,
1.75, 2.5, 3.25, 4, 5]},
  //... all enchantments defined here
},
// Defines all gems and their scaling values per grade
gems: {
  warstone: { name: "WarStone", effect: 'Increase Base Weapon Class', values: [1.5, 2.5,
3.5, 5, 7, 9, 11, 13, 15]},
  // ... all gems defined here
},
// Defines all monsters and their base stats before scaling
monsters: {
  glimmeringGolem: { name: 'Glimmering Golem', baseHp: 25, baseAtk: 10, baseDef: 13,
baseXP: 15, baseGold: 3},
  //... all base monster definitions here
}
};

```

6.2. Finalized Data Schemas

- **Player-Facing Display:**
 - **Character Identity:** Race: Human, A-SPEC: FTR-Sword/Sword, CCI: The Versatile Duelist
 - **Gem Naming:** Grade Tier 9 WarStone
- **Standard Equipment ID Schema:** EID-SLOT-TID (e.g., greataxe-WPN-T10)
- **Shadow & Echo Item ID Schema:** EID-SLOT-TID-TYPE-Q-ENCH (e.g., greataxe-WPN-T10-shadow-q1.25-ench_warheart_enchanted_3)
- **Gem ID Schema (Future-Proofed):** EID-TYPE-GT-T (e.g., warstone-GEM-GT9-T1)

6.3. Archetype-Driven Logic

To ensure perfect mathematical balance and prevent unintended stat scaling, the game's core combat calculations are strictly governed by the character's **archetype** property, which is permanently set upon character creation.

Implementation Logic

When calculating a character's derived stats (WC, SC, Hit Chance, etc.), the game engine will follow a strict conditional logic:

1. **Check Archetype:** The first check is always for the character's primary archetype (True Fighter, True Caster, or Hybrid).
2. **Apply Archetype-Specific Formulas:** The engine will ONLY use the formulas designated for that archetype in Section 1.3.
 - If archetype === 'True Fighter', the engine will calculate WC based on DEX, but it will **completely ignore** any formulas for SC. A Fighter's SC will always be 0.
 - If archetype === 'True Caster', the engine will calculate SC based on WIS, but it will **completely ignore** any formulas for WC. A Caster's WC will always be 0.
 - If archetype === 'Hybrid', the engine will then perform a second check for the character's sub-archetype (Martial or Mystic) and apply the appropriate dual-scaling formulas for both WC and SC.

This hierarchical logic ensures that a True Fighter putting points into DEX will never accidentally gain Spell Class, as the code path to calculate SC from DEX only exists for the Martial Hybrid sub-archetype. This guarantees that the unique scaling of Hybrids is contained and does not affect the balance of the other two core archetypes.

Itemization Logic

- **Hybrid-Specific Gear:** To maintain the power budget, Hybrids can only equip items designated for the "Hybrid" archetype. This gear is designed with lower base WC and SC values compared to specialist gear of the same tier. This is the primary balancing factor for their dual-scaling attribute.
- **Visuals vs. Mechanics:** We will create "Hybrid" versions of existing weapon and spell visuals. For example, a greataxe-WPN-T10 is for a True Fighter. The Hybrid version will be greataxe_hybrid-WPN-T10. It will look the same to the player, but the game engine will read its ID and know it has the lower, balanced base stats appropriate for a Hybrid. This saves significant art asset development time.

Appendices

Appendix A: Master Character Creation Data

Appendix A1: Definitive Race & Combat Identity Matrix

This table outlines the core combat role for every playable race in Geminus. Each race is locked into a specific archetype and specialization, granting them a unique title and a distinct Core Combat Identity (CCI).

True Fighters

Race	Definitive Archetype	Specialist Title	Weapon Combination	Core Combat Identity (CCI)
Human	True Fighter	Blademaster	Sword/Sword	The Versatile Duelist
Dragonborn	True Fighter	Blademaster	Sword/Sword	The Powerhouse Knight
Orc	True Fighter	Mauler	Mace/Mace	The Definitive Mace Wielder
Werewolf	True Fighter	Ravager	Claw/Claw	The Definitive Claw Wielder
Minotaur	True Fighter	Executioner	Axe/Axe	The Definitive Axe Wielder

Troll	True Fighter	Juggernaut	Staff/Staff	The Definitive Staff Wielder
Hobbit	True Fighter	Cutthroat	Dagger/Dagger	The Definitive Dagger Wielder
Centaur	True Fighter	Sharpshooter	Bow/Arrow	The Definitive Ranged Wielder

True Casters

Race	Definitive Archetype	Specialist Title	Spell Combination	Core Combat Identity (CCI)
Phoenix	True Caster	Pyromancer	Fire/Fire	The Explosive Pyromancer
Tiefling	True Caster	Pyromancer	Fire/Fire	The Infernal Sorcerer
Mermaid	True Caster	Cryomancer	Cold/Cold	The Definitive Cold Caster
Gnome	True Caster	Geomancer	Earth/Earth	The Definitive Earth Caster

Griffin	True Caster	Aeromancer	Air/Air	The Definitive Air Caster
Vampire	True Caster	Sanguinist	Drain/Drain	The Definitive Drain Caster
Elf	True Caster	Arcanist	Arcane/Arcane	The Definitive Arcane Caster
Baba Yaga	True Caster	Necromancer	Death/Death	The Definitive Death Caster

Hybrids

Race	Definitive Archetype	Sub-Archetype	Weapon/Spell Combination	Core Combat Identity (CCI)
Angel	Hybrid	Martial (DEX)	Sword/Arcane	Celestial Spellblade
Aasimar	Hybrid	Martial (DEX)	Mace/Arcane	Divine Arbiter
Banshee	Hybrid	Martial (DEX)	Dagger/Arcane	Trickster Rogue
Halfling	Hybrid	Martial (DEX)	Staff/Arcane	Mystical Guardian

Dwarf	Hybrid	Mystic (WIS)	Axe/Fire	Runic Forgemaster
Demon	Hybrid	Mystic (WIS)	Staff/Fire	Hellfire Acolyte
Draugr	Hybrid	Mystic (WIS)	Staff/Death	Wailing Executioner
Unicorn	Hybrid	Mystic (WIS)	Sword/Death	Undead Blightknight

Appendix A2: Definitive Archetype Stat Weights

This table outlines the primary, secondary, and tertiary stats that determine the combat effectiveness of each definitive archetype. These weights directly influence damage and power calculations.

Corrected Appendix A2: Definitive Archetype Stat Weights

Definitive Archetype	Primary Stat	Secondary Stat	Tertiary Stat	Notes / Applicable Races
True Fighter	DEX	STR	VIT	Standard fighter build. (Human, Dragonborn, Orc, Werewolf, Minotaur, Hobbit, Centaur)

True Caster	WIS	INT	VIT	Standard caster build. (Phoenix, Tiefling, Mermaid, Gnome, Griffin, Elf, Baba Yaga)
Hybrid (Martial)	DEX	STR	INT	Focuses on physical prowess augmented by magic. (Angel, Aasimar, Banshee, Halfling)
Hybrid (Mystic)	WIS	INT	STR	Focuses on magical prowess augmented by physical arms. (Dwarf, Demon, Draugr, Unicorn)
True Fighter (VIT)	VIT	DEX	STR	Special Case: Damage scales with Vitality. (Troll)
True Caster (VIT)	VIT	WIS	INT	Special Case: Spell Power scales with Vitality. (Vampire)

Design Philosophy:

- **Primary Stat:** The main driver of damage/power for the archetype. Players should always prioritize this stat on gear.
- **Secondary Stat:** Provides significant but lesser combat benefits, such as critical hit chance, accuracy, or resource management.
- **Tertiary Stat:** Offers baseline survivability and minor combat bonuses.
- **VIT-Scaling:** The Troll and Vampire archetypes are intentionally designed to break this mold, making Vitality their primary offensive stat. This creates a unique gearing and gameplay path centered on tankiness translating directly into power.

Table A3: Finalized Racial Passives (Tier 1)

This table reflects the definitive list we finalized in our conversation.

Race	Passive Name	Standardized Mechanical Effect
Human	Adaptable Combatant	Racial Power from DEX applied to Double Hit Chance %
Dragonborn	Draconic Might	Racial Power from DEX applied to Weapon Class
Orc	Savage Blows	Racial Power from DEX applied to Weapon Class

Werewolf	Feral Frenzy	Racial Power from DEX applied to Double Hit Chance %
Minotaur	Overpower	Racial Power from DEX applied to Critical Hit Damage %
Troll	Regenerative Fury	Racial Power from VIT applied to Weapon Class
Hobbit	Unseen Strike	Racial Power from DEX applied to Critical Hit Damage %
Centaur	Unerring Aim	Racial Power from DEX applied to Hit Chance %
Phoenix	Immolate	Racial Power from WIS applied to Critical Hit Damage %

Tiefling	Infernal Pact	Racial Power from WIS applied to Spell Class
Mermaid	Crushing Depths	Racial Power from WIS applied to Spell Class
Gnome	Arcane Attunement	Racial Power from WIS applied to Spell Critical Hit Chance %
Griffin	Sky's Wrath	Racial Power from WIS applied to Spell Class
Vampire	Blood Rush	Racial Power from VIT applied to Spell Class
Elf	Elven Grace	Racial Power from WIS applied to Spell Class
Baba Yaga	Witch's Curse	Racial Power from WIS applied to Spell Class

Angel	Angelic Vengeance	Racial Power from DEX applied to Spellstrike Damage %
Aasimar	Divine Judgment	Racial Power from DEX applied to Spellstrike Damage %
Banshee	Wail of Doom	Racial Power from DEX applied to Spellstrike Damage %
Halfling	Lethal Precision	Racial Power from DEX applied to Spellstrike Damage %
Dwarf	Runic Power	Racial Power from WIS applied to Spellstrike Damage %
Demon	Demonic Fury	Racial Power from WIS applied to Spellstrike Damage %

Draugr	Undying Cold	Racial Power from WIS applied to Spellstrike Damage %
Unicorn	Pure Magic	Racial Power from WIS applied to Spellstrike Damage %

Appendix B: Master Progression Tables

Gear Tier Progression, Costs, and Requirements

Tier	Base AC (Armor)	Base WC/SC (W/S)	Min. Level Req.	Gold Cost per Set (7 pcs)
I	10	8	1	350,000
II	18	14	1	612,500
III	31	24	100	1,071,875
IV	54	42	135	1,875,776
V	98	77	184	3,282,615
VI	165	130	253	5,744,578

VII	289	227	386	10,053,015

Appendix C: Complete Bestiary (Z01-Z101)

This appendix contains the full list of all 101 zones and their respective monsters and stats, as per the GDD's Golden Rule.

Z01-Z24: Starter Zones

Min. Level: 1

The following 24 starter zones all share the same monster list and stats. Each zone is the starting area for its associated race(s).

1. Crystal Caves (Dwarf)

2. Elvenwood (Elf)
3. Shifting Maze (Halfling)
4. Arid Badlands (Human)
5. Glimmering Springs (Gnome)
6. Blazefire Wastes (Tiefling)
7. Abyssal Fen (Mermaid)
8. Moss-Covered Forest (Werewolf)
9. Cinder Barrens (Orc)
10. Echo Mountain (Hobbit)
11. Labyrinth (Minotaur)
12. Steppe (Centaur)
13. Cloud Peak (Griffin)
14. Emberfall (Phoenix)
15. Glimmering Glade (Unicorn)
16. Swamps (Baba Yaga)
17. Gravefrost Peaks (Draugr)
18. Sunken City of Atla (Dragonborn)
19. Gloomwood (Vampire)
20. Corrupted Jungle (Demon)
21. Primal Chasm (Troll)
22. Sunken City of Eldoria (Aasimar)
23. Blazefire Forge (Phoenix)
24. Heavenly Spires (Angel)

Appendix C1 Master Zone Progression & Bestiary

C1: Zone Progression Table This table defines the mechanical archetype, drop rates, and key rewards for all 101 zones.

Zone ID	Zone Name	Min Level	Type	Shadow Drop Rate	Gem Grade	Gem Drop Rate	Gold Multiplier	Notes
Z01-Z24	Starter Zones	1	Standard	1 in 600	Grade 1 Only	1 in 400	1x	Starter areas for all races.
Z25	Echoing Chasms	100	Shadow Zone	1 in 500	Grade 1-2	1 in 100	1x	First major Shadow farming zone.
Z26-Z33	Starfall Deserts (et al)	120+	XP Zone	1 in 600	Grade 1-2	1 in 400	1x	Standard progression.
Z27	Golden Plains	140	Gold Zone	None	Grade 1-2	1 in 400	5x	Tier III Gold Spike.

Z34	Bone Deserts	253	Gem Zone	None	Grade 3 Only	1 in 100	1x	Targeted Grade 3 Gem Farm.
Z35	Gilded Sands	300	Gold Zone	None	Grade 1-3	1 in 400	5x	Tier VI Gold Spike.
Z36-Z46	Mid-Game Wilds	350+	XP Zone	1 in 600	Grade 1-4	1 in 400	1x	Standard progression.
Z47	Emerald Vault	900	Gold Zone	None	Grade 1-4	1 in 400	5x	Tier IX Gold Spike.
Z51	Giant Mushroom Forests	1,000	Gem Zone	None	Grade 4 Only	1 in 100	1x	Targeted Grade 4 Gem Farm.
Z59	The Weaving Caves	6,143	Gem Zone	None	Grade 5 Only	1 in 100	1x	Targeted Grade 5 Gem Farm.
Z60	Shadowed Expanse	6,500	Shadow Zone	1 in 400	Grade 1-6	1 in 100	1x	Mid-game Shadow Farm.

Z65	Obsidian Treasury	9,000	Gold Zone	None	Grade 1-6	1 in 400	5x	Tier XII Gold Spike.
Z66	The Bloodfang Jungle	13,636	Gem Zone	None	Grade 6 Only	1 in 100	1x	Targeted Grade 6 Gem Farm.
Z72	Gravity-Defying Rapids	35,452	Gem Zone	None	Grade 7 Only	1 in 100	1x	Targeted Grade 7 Gem Farm.
Z77	Ruby Citadel	38,000	Gold Zone	None	Grade 1-8	1 in 400	5x	Tier XV Gold Spike.
Z79	The Glittering Grottos	83,333	Gem Zone	None	Grade 8 Only	1 in 100	1x	Targeted Grade 8 Gem Farm.
Z80	Celestial Rift	84,000	Shadow Zone	1 in 300	Grade 1-8	1 in 100	1x	High-tier Shadow Farm.
Z85	Sapphire Bastion	89,000	Gold Zone	None	Grade 1-9	1 in 400	5x	Tier XVIII Gold Spike.

Z87	Gelatinous Jungles	172,222	Gem Zone	None	Grade 9 Only	1 in 100	1x	"Super Easy" Monsters (10% HP/ATK).

Special Monster Title System

Tier	Title (Suffix)	Rarity (vs. Base)	Key Effects
1	Gilded	1 in 250	12x Gold Multiplier
1	Echo	1 in 250	2x Stats, 2x Gold, 4x Drop Chance
1	Marauder	1 in 250	+70% Double Hit
2	Tyrant	2x Rarer	3x Gold, 2x XP, 4x Drop Chance
2	Dreadlord	2x Rarer	4x Stats, 3x Gold, 4x XP, +3 Alignment
3	Juggernaut	4x Rarer	10x Health, +5 Armor Class
3	Hexer	4x Rarer	2x Stats, 5x Drop Chance, +5 Spell Class
4	Apex	12x Rarer	4x Stats, 4x Gold/XP, +50% Double Hit, Guaranteed Shadow Drop
4	Behemoth	12x Rarer	5x Health, 2x Gold, 5x XP, +7 AC, Guaranteed Gem Drop

5	Terminus	Unique	Instant Death. Player's gold is added to a global jackpot.

C3: Special Monster Title System (Expanded) Alightment

Tier	Title (Suffix)	Rarity	Key Effects	Alignment
1	Marauder	1 in 250	+70% Double Hit	Benevolent Act (Killing grants +1 Alignment)
2	Dreadlord	2x Rarer	4x Stats, 3x Gold, 4x XP	Benevolent Act (Killing grants +2 Alignment)
3	Juggernaut	4x Rarer	10x Health, +5 Armor Class	Malevolent Act (Killing grants -1 Alignment)
4	Apex	12x Rarer	4x Stats, 4x Gold/XP, +50% Double Hit,	Malevolent Act (Killing grants -2 Alignment)

			Guaranteed Shadow Drop	
5	Terminus	Unique	Instant Death Effect. Player's carried gold is lost and added to a global server-wide "Jackpot."	Neutral

Appendix D: Master Gem Compendium

D1: Standard Gems

Caster Gems (Blue)

Gem Name	Effect	Grade 1-9 Values (%)
LoreStone	Increase Base Spell Class	1.5, 2.5, 3.5, 5, 7, 9, 11, 13, 15
Mindrite	Increase Wisdom	5, 7.5, 10, 12.5, 15, 20, 30, 40, 50
Dullrite	Decrease Enemy Wisdom	8, 10, 12, 14, 16, 19, 22, 26, 30

Drainrite	Steal Enemy Wisdom	4, 6, 9, 15, 25, 40, 50, 60, 75
MindStone	Increase Intelligence	5, 7.5, 10, 12.5, 15, 20, 30, 40, 50
DullStone	Decrease Enemy Intelligence	8, 10, 12, 14, 16, 19, 22, 26, 30
DrawStone	Steal Enemy Intelligence	4, 6, 9, 15, 25, 40, 50, 60, 75

Fighter/Hybrid Gems (Red)

Gem Name	Effect	Grade 1-9 Values (%)
WarStone	Increase Base Weapon Class	1.5, 2.5, 3.5, 5, 7, 9, 11, 13, 15
Mightrite	Increase Dexterity	5, 7.5, 10, 12.5, 15, 20, 30, 40, 50
Cripplite	Decrease Enemy Dexterity	8, 10, 12, 14, 16, 19, 22, 26, 30
Siphilite	Steal Enemy Dexterity	4, 6, 9, 15, 25, 40, 50, 60, 75
MightStone	Increase Strength	5, 7.5, 10, 12.5, 15, 20, 30, 40, 50
WeakStone	Decrease Enemy Strength	8, 10, 12, 14, 16, 19, 22, 26, 30
SapStone	Steal Enemy Strength	4, 6, 9, 15, 25, 40, 50, 60, 75

Misc/Support Gems (Green/Yellow)

Gem Name	Effect	Grade 1-9 Values (%)	Notes:
Obsidian Heart	Increase Base Armor	1.5, 2.5, 3.5, 5, 7, 9, 11,	
	Class	13, 15	
Spike-Core	Increase Critical Hit	1, 2.5, 5, 7.5, 10, 12.5,	
	Chance	15, 17.5, 20	
True-Core	Increase Hit Chance	3, 6, 9, 12, 15, 18, 21,	
		25, 30	
Veil-Core	Decrease Enemy Hit	2.7, 5.4, 8.1, 10.8, 13.5,	
	Chance	16.2, 18.9, 22.5, 27	
Vital-Core	Increase Vitality	5, 7.5, 10, 12.5, 15,	God-tier gem for Trolls and Vampires. The core of all VIT-scaling builds.
		20, 30, 40, 50	
Blood-Core	Steal Enemy Health	4, 6, 9, 15, 25, 40,	Functions as direct life steal. For Casters, this manifests as Spell Life Steal. Essential for Vampires.
		50, 60, 75	
Shadow-Core	Increase Shadow Drop	8, 10, 12, 14, 16, 19,	
	Chance	22, 26, 30	
Treasure-Core	Increase Drop Chance	2, 3, 4, 5, 6, 7, 8, 9, 10	

Ascend-Core	Increase Experience Gain	2, 4, 6, 9, 12, 15, 19, 24, 30	
Midas-Core	Increase Gold Earned	2, 4, 6, 9, 12, 15, 19, 24, 30	
Masterwork-Core	Increase Mastery Chance	5, 10, 15, 20, 25, 30, 35, 40, 50	
Echoing-Core	Increase Double Hit Chance	2, 3, 4, 5, 6, 7, 8, 10, 12	
Harvester-Core	Increase Resource Drop Chance	5, 10, 15, 20, 30, 50, 55, 60, 75

Appendix F: Master Accessory Compendium

F1: Shop Accessories

These artifacts can be purchased from a special vendor in the endgame, providing a clear path to power for wealthy players.

Utility Accessories

Accessory Name	Type	Gold Cost	Effect
Sage's Monocle	Monocle	500,000,000	+15% Experience Gain.
Hoarder's Lode	Lodestone	500,000,000	+25% Gold Find.
Whispering Compass	Compass	1,000,000,000	+5% Shadow Drop Chance.
Geode Breaker's Charm	Charm	750,000,000	+20% Gem Drop Chance.

Legendary Archetype Accessories

Accessory Name	Type	For Archetype	Gold Cost	Effect
Medallion of the Iron Legion	Medallion	True Fighter	2,500,000,000	Your attacks have a 5% chance to be a 'Glancing Blow', dealing 50% of your Weapon Class as additional, unmitigated damage.
Signet of the Arcane Conclave	Signet	True Caster	2,500,000,000	Your spells have a 5% chance to be 'Amplified', restoring 10% of their mana cost and increasing your Spell Critical Hit Chance by

				10% for 3 seconds.
Clasp of the Dervish	Clasp	Martial Hybrid	2,500,000,000	On Spellstrike, your attack speed is increased by 15% for 3 seconds.
Talisman of the Runeguard	Talisman	Mystic Hybrid	2,500,000,000	On Spellstrike, you gain a 'Runic Ward' that absorbs damage equal to 20% of your WIS. The ward lasts for 5 seconds or until depleted.
Totem of the Enduring Earth	Totem	Troll (VIT FTR)	2,500,000,000	Increases the amount of health regenerated per tick by a flat 25% of your total VIT.
Pendant of Sanguine Thirst	Pendant	Vampire (VIT CST)	2,500,000,000	Increases the effectiveness of all 'Steal Health' effects by 15%.

F2: Unique Boss Drop Accessories

These legendary artifacts can only be obtained by defeating specific zone bosses and represent the ultimate chase items for each build.

Utility Accessories

Rarity	Accessory Name	Type	Boss Source	Effect

2 (Uncommon)	Seeker's Folly	Compass	Z59: Webbed Golem	+10% Shadow Drop Chance.
2 (Uncommon)	Dragon's Tooth of Avarice	Tooth	Z66: Blood Mosquito	+50% Gold Find.
3 (Rare)	Oculus of the Perpetual Learner	Oculus	Z72: Upside-Down Crab	+30% Experience Gain.
3 (Rare)	Heart of the Crystal Grotto	Heart	Z75: Soul Eater	+40% Gem Drop Chance.

Legendary Archetype Accessories

Rarity	Accessory Name	Type	For Archetype	Boss Source	Effect
4 (Epic)	Grasp of the Unrelenting	Gauntlet	True Fighter	Z87: Congealed Horror	Double Hits have a 25% chance to become a Triple Hit.
4 (Epic)	Eye of the Malevolent Storm	Eye	True Caster	Z87: Congealed Horror	Your spells ignore 20% of the target's magic resistance.
5 (Legendary)	Band of the Bladed Gale	Band	Martial Hybrid	Z97: Crowned Manta	Spellstrike now hits a second nearby target

					for 33% of its damage.
5 (Legendary)	Relic of the Adamant Bulwark	Relic	Mystic Hybrid	Z97: Crowned Manta	Successful Spellstrikes have a 20% chance to trigger a defensive nova, dealing 150% of your WIS as damage to all nearby enemies.
5 (Legendary)	Primordial Heart of the Juggernaut	Heart	Troll (VIT FTR)	Z101: Echo of Regret	Converts 5% of your total Maximum Health into flat Weapon Class.
5 (Legendary)	Grimoire of the Crimson Covenant	Grimoire	Vampire (VIT CST)	Z101: Echo of Regret	For every 1% of your health you restore via Steal Health, you gain a stack of 'Blood Essence' (max 100). Each stack increases your Spell Class by 0.1%. Stacks decay slowly outside of combat.

Appendix G: Master Quest Compendium

Quest Name	Objective	Time Limit	Rewards (Base)
Goblin Cull	Kill 100 StartZone Monsters	10 Minutes	50,000 Gold, 100,000 XP
Chasms Bounty	Kill 50 Shriekers in Echoing Chasms (Z25)	15 Minutes	250,000 Gold, 500,000 XP, 1x Grade Tier 2 Gem
Desert Bones	Kill the Bone Deserts (Z34) Zone Boss	5 Minutes	1,000,000 Gold, 2,000,000 XP, 1x Grade Tier 3 Gem
Shadow Hunt	Acquire any 1 Shadow Item	60 Minutes	5,000,000 Gold, 1x Random Grade Tier 5 Gem
Timed Run	Kill 100 monsters in any zone of Tier X or higher	5 Minutes	10,000,000 Gold, 2x Random Grade Tier 6 Gems
The First Hunt	Hunt a special monster on a Corrupt Elemental (Z32)	4 Hours	1.0M XP, 75k Gold, Talisman of the Apprentice
The Scarred Peaks	Hunt a special monster on a Crag Horror (Z40)	4 Hours	2.5M XP, 180k Gold, Band of the Relentless
The Grand Hunt	Hunt a special monster on a Cacophony Spirit (Z47)	4 Hours	5.0M XP, 350k Gold, Medallion of the Bounty Hunter

Quest Name	Objective	Time Limit	Rewards (Base)
Goblin Cull	Kill 100 StartZone Monsters	10 Minutes	50,000 Gold, 100,000 XP

Appendix J: Master Dropper Equipment Compendium

This appendix contains the definitive, unabridged data for all standard shop-available "Dropper" equipment. Per the GDD Golden Rule, these tables and formulas are the single source of truth for base item stats, from which all other item variations (Shadows, Echos) are derived.

J1: Core Dropper Mechanics & Stat Calculation

"Dropper" items are the standard gear available for purchase in shops, spanning 20 Tiers (I-XX) of power. Their foundational power is determined by a

classValue, which is then distributed across gear slots.

- **Base Stat Formula:** The fundamental power of a Dropper item is its **classValue** (WC, SC, or AC), determined by its Tier using the following formula:

$$\text{classValue} = 13 \times (1.22^{\text{Tier} - 1})$$
- **Stat Distribution by Slot:** The **classValue** is applied differently depending on the equipment slot. Some slots also provide a special bonus.

Organization Table (Modern Bullet-Point Format)

Weapons (1/2):

- Item Types: Axe, Bow, Arrow, Claw, Dagger, Mace, Staff, Sword
- Stat Proportionality: 100% of class value as WC
- Special Bonus: None

Spells (1/2):

- Item Types: Air, Arcane, Cold, Death, Drain, Earth, Fire
- Stat Proportionality: 100% of class value as SC
- Special Bonus: None

Caster Off-Hand (1/2):

- Item Types: Wand
- Stat Proportionality: 25% of class value as SC
- Special Bonus: None

Fighter Buff Spells (1/2):

- Item Types: Crystal Ball
- Stat Proportionality: 25% of class value as WC
- Special Bonus: None

Armor (Chest):

- Item Types: Chest
- Stat Proportionality: 100% of class value as AC
- Special Bonus: None

Helmet:

- Item Types: Helmet
- Stat Proportionality: 75% of class value as AC
- Special Bonus: None

Boots:

- Item Types: Boots
- Stat Proportionality: 75% of class value as AC
- Special Bonus: None

Leggings:

- Item Types: Leggings
- Stat Proportionality: 50% of class value as AC
- Special Bonus: +10% to final Hit Chance

Gauntlets:

- Item Types: Gloves
- Stat Proportionality: 50% of class value as AC
- Special Bonus: +15% to final WC/SC

Jewelry:

- Item Types: Necklace, Ring
- Stat Proportionality: 0% of class value
- Special Bonus: See Appendix I

Slot	Item Types	Stat Proportionality	Special Bonus
Weapon 1/2	Axe, Bow, Arrow, Claw, Dagger, Mace, Staff, Sword , Caster Off Hand	100% of classValue as WC 25% SC per caster of hand	None

Jewelry	Necklace, Ring	0% of classValue

J2: Definitive Dropper Progression Table (Supersedes Appendix B)

This table presents the finalized, unabridged progression for all Dropper items, including the calculated **classValue** that serves as the **BaseItemStat** referenced in Section 2.1.1. This table corrects and supersedes the values previously listed in Appendix B.

Tier	Min. Level Req.	Gold Cost per Piece	Calculated classValue (Base WC/SC/AC)
I	1	50,000	13.00
II	1	87,500	15.86
III	100	153,125	19.35
IV	135	267,968	23.61
V	184	468,945	28.80
VI	253	820,654	35.14
VII	386	1,436,145	42.87
VIII	1,000	2,513,253	52.30
IX	3,571	4,398,193	63.81
X	6,143	7,696,838	77.85
XI	8,714	13,469,467	94.97

XII	17,272	23,571,567	115.87
XIII	28,180	41,250,242	141.36
XIV	39,088	72,187,924	172.46
XV	50,000	126,328,867	210.40
XVI	83,333	221,075,517	256.69
XVII	127,777	386,882,155	313.16
XVIII	172,222	677,043,771	382.06
XIX	216,666	1,184,826,599	466.11
XX	400,000	2,073,446,549	568.65

J3: Definitive Dropper Item Stats by Slot

The following tables detail the final, calculated base stats for every Dropper item across all 20 Tiers, derived from the **classValue** in Table J2 and the proportions in Table J1.

Weapons (100% WC) & Spells (100% SC)

- **Weapon Types:** Axe, Bow, Arrow, Claw, Dagger, Mace, Staff, Sword, Caster Off Hand
- **Spell Types:** Air, Arcane, Cold, Death, Drain, Earth, Fire. Fighter Buff spell

- The **classValue** from Table J2 is applied directly as Base WC or Base SC. For example, a Tier X Axe has a Base WC of **77.85**.

Armor Slots (AC)

Tier	Chest (100% AC)	Helmet (75% AC)	Boots (75% AC)	Leggings (50% AC)	Gauntlets (50% AC)
I	13.00	9.75	9.75	6.50	6.50
II	15.86	11.90	11.90	7.93	7.93
III	19.35	14.51	14.51	9.67	9.67
IV	23.61	17.70	17.70	11.80	11.80
V	28.80	21.60	21.60	14.40	14.40
VI	35.14	26.35	26.35	17.57	17.57
VII	42.87	32.15	32.15	21.43	21.43
VIII	52.30	39.22	39.22	26.15	26.15
IX	63.81	47.85	47.85	31.90	31.90
X	77.85	58.38	58.38	38.92	38.92

XI	94.97	71.23	71.23	47.49	47.49
XII	115.87	86.90	86.90	57.93	57.93
XIII	141.36	106.02	106.02	70.68	70.68
XIV	172.46	129.34	129.34	86.23	86.23
XV	210.40	157.80	157.80	105.20	105.20
XVI	256.69	192.52	192.52	128.34	128.34
XVII	313.16	234.87	234.87	156.58	156.58
XVIII	382.06	286.54	286.54	191.03	191.03
XIX	466.11	349.58	349.58	233.05	233.05
XX	568.65	426.49	426.49	284.33	284.33

- **Special Bonuses:** In addition to the AC values above, Leggings provide a **+10% bonus to final Hit Chance** and
 - Gauntlets provide a **+15% bonus to final WC/SC**.

Caster Off-Hands (25% SC) & Fighter Buff Spells (25% WC)

Caster Off-Hand

Fighter buff spell

The base SC for Caster Off-Hands and the base WC for Fighter Buff Spells are calculated as 25% of the tier's classValue from Table J2.

Tier	Calculated Base SC/WC (25% of classValue)
I	3.25
II	3.97
III	4.84
IV	5.90
V	7.20
VI	8.79
VII	10.72
VIII	13.08
IX	15.95

X	19.46
---	-------

XI	23.74
----	-------

XII	28.97
-----	-------

XIII	35.34
------	-------

XIV	43.12
-----	-------

XV	52.60
----	-------

XVI	64.17
-----	-------

XVII	78.29
------	-------

XVIII	95.52
-------	-------

XIX	116.53
-----	--------

XX	142.16
----	--------
